Old Chinese A New Reconstruction By Baxter William H Sagart Laurent 2014 Hardcover:

Old Chinese William H. Baxter, Laurent Sagart, 2014-09-02 This book introduces a new linguistic reconstruction of the phonology morphology and lexicon of Old Chinese the first Sino Tibetan language to be reduced to writing Old Chinese is the language of the earliest Chinese classical texts 1st millennium BCE and the ancestor of later varieties of Chinese including all modern Chinese dialects William Baxter and Laurent Sagart's new reconstruction of Old Chinese moves beyond earlier reconstructions by taking into account important new evidence that has recently become available better documentation of Chinese dialects that preserve archaic features such as the Min and Wuxiang dialects better documentation of languages with very early loanwords from Chinese such as the Hmong Mien Tai Kadai and Vietnamese languages and a flood of Chinese manuscripts from the first millennium BCE excavated or discovered in the last several decades Baxter and Sagart also incorporate recent advances in our understanding of the derivational processes that connect different words that have the same root They expand our knowledge of Chinese etymology and identify for the first time phonological markers of pre Han dialects such as the development of r to j in a group of east coast dialects but to n elsewhere The most up to date reconstruction available Old Chinese A New Reconstruction brings the methodology of Old Chinese reconstruction closer to that of comparative reconstructions that have been used successfully in other language families It is critical reading for anyone seeking an advanced understanding of Old Chinese

Anthology of Kokugaku Scholars John R. Bentley, 2017-12-31 Kokugaku national study is an academic field of study that spans a number of disciplines including philology poetry literature linguistics history religion and philosophy It began as a movement to recapture a sense of Japanese uniqueness by focusing on Japanese poetic and linguistic elements found in the earliest surviving texts As the movement grew there was an attempt to separate native religious elements from Buddhist elements This expanded to a vigorous attempt to weed out Confucian and by extension anything Chinese elements from native elements This began as an investigation into the earliest anthology Man yoshu which some Kokugaku scholars argued preserved a pristine picture of the true heart of the ancients Kokugaku matured under the tutelage of Kamo no Mabuchi and Motoori Norinaga and expanded to include literary linguistic and historical analysis With the death of Norinaga the philosophy of the movement fractured and under Hirata native religious elements were amplified with an advance toward nationalism This anthology contains 26 essays by 13 influential Kokugaku scholars covering roughly two centuries of thought from 1690 down to the beginning of the Meiji Restoration in 1868 The volume is arranged according to four subjects poetry literature scholarship and religion Japan as a state

Old Chinese William Hubbard Baxter, Laurent Sagart, 2013 This text introduces a new linguistic reconstruction of the phonology morphology and lexicon of Old Chinese the language of the earliest Chinese classical texts 1st millennium BCE

The Roots of Old Chinese Laurent Sagart, 1999-01-01 The phonology morphology and lexicon of late Zhou Chinese are examined in this volume It is argued that a proper understanding of Old Chinese morphology is essential in correctly

reconstructing the phonology Based on evidence from word families modern dialects and related words in neighboring languages Old Chinese words are claimed to consist of a monosyllabic root to which a variety of derivational affixes attached This made Old Chinese typologically more like modern languages such as Khmer Gyarong or Atayal than like Middle and modern Chinese where only faint traces of the old morphology remain In the first part of the book the author proposes improvements to Baxter s system of reconstruction regarding complex initials and rhymes and then reviews in great detail the Old Chinese affixal morphology New proposals on phonology and morphology are integrated into a coherent reconstruction system The second part of the book consists of etymological studies of important lexical items in Old Chinese The author demonstrates in particular the role of proportional analogy in the formation of the system of personal pronouns Special attention is paid to contact phenomena between Chinese and neighboring languages and unlike most literature on Sino Tibetan the author identifies numerous Chinese loanwords into Tibeto Burman The book which contains a lengthy list of reconstructions an index of characters and a general index is intended for linguists and cultural historians as well as advanced students
