Hilty, Matthias Lamping, Josef Drexler, 2016-01-29 This book examines the impact and shortcomings of the TRIPS Agreement which was signed in Marrakesh on 15 April 1994 Over the last 20 years the framework conditions have changed fundamentally New technologies have emerged markets have expanded beyond national borders some developing states have become global players the terms of international competition

have changed and the intellectual property system faces increasing friction with public policies The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation or whether it needs to be understood or even reconceptualized as a framework regulation for the international protection of intellectual property The purpose therefore is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today's global economy *Private Law and Competition Regulation* Alberto Brown, 2024-07-12

This book explores the distinction between private and public aspects in competition law and focuses on how the concept of competition is incorporated into the legal framework Distinguishing between antitrust regulations and competition related legal rules in private law such as unfair competition and contract laws the book also differentiates between the utilitarian and deontological principles that underpin competition regulation This historical and philosophical approach is used to compare two influential jurisdictions England and Spain These legal systems have had a significant impact on the development of legal rules in Common law and Civilian Latin American countries respectively Through this lens the book further analyses the concept of competition and its value in each legal tradition This understanding in turn helps clarify the scope of competition regulation within antitrust and private law and how the two fields coexist Additionally the book examines the role of property law theory in the context of competition regulation The book will be of interest to students and scholars in the field of competition law tort law and legal history *Entertainment Law Reporter*, 2000 Motion pictures television radio music theater publishing sports
