Allergy Frontiers: Classification and Pathomechanisms Ruby Pawankar, Stephen T. Holgate, Lanny J. Rosenwasser, 2009-03-13 When I entered the field of allergy in the early 1970s the standard textbook was a few hundred pages and the specialty was so compact that texts were often authored entirely by a single individual and were never larger than one volume Compare this with Allergy Frontiers Epigenetics Allergens and Risk Factors the present s volume text with well over 150 contributors from throughout the world This book captures the explosive growth of our specialty since the single author textbooks referred to above The unprecedented format of this work lies in its meticulous attention to detail yet comprehensive scope For example great detail is seen in manuscripts dealing with topics such as Exosomes naturally occurring minimal antigen presenting units and Neuropeptide S receptor 1 NPSR1 an asthma susceptibility gene The scope is exemplified by the unique approach to disease entities normally dealt with in a single chapter in most texts For example anaphylaxis a topic usually confined to one chapter in most textbooks is given five chapters in Allergy Frontiers This approach allows the text to employ multiple contributors for a single topic giving the reader the advantage of being introduced to more than one viewpoint regarding a single disease

Jin Gui Yao Lue Zhang Ji,2022-07-26 The J n Gu Y o L e Essential Prescriptions of the Golden Cabinet like its sister volume the Sh ng H n L n On Cold Damage is a gem reconstituted from fragments of a lost text called the Sh ng H n Z B ng L n On Cold Damage and Miscellaneous Diseases by indisputably the most brilliant medical mind that China ever produced the H n Dynasty physician Zh ng J Zh ng Zh ng J ng Exerting an influence on the development of Chinese medicine unmatched by any other medical scholar Zh ng integrated the then relatively new theories of systematic correspondence of the N ij ng and N nj ng with an already vast practical knowledge knowledge in the use of medicinals Such was his brilliance

that it was not fully recognized by Chinese physicians until centuries later in the Song Dynasty when Zhang's combination of theory and practice became the mainstream in Chinese medicine that survived centuries of scrutiny from successive generations of medical scholars and buttressed traditional medicine against the challenge of Western in the twentieth century. Combining theoretic etiologies with detailed diagnosis and skillfully devised treatments, Zhang's work has left an indelible print on traditional medicine in China for nearly 2 000 years. A third of the most commonly used formulas in Chinese medical practice today were devised by Zhang. The *Jin Gu Yao Lue* covers diseases other than the external contractions dealt with in the *Sheng Huo Lun* and includes lung diseases, water swelling, dissipation, thirst, impediment, summerheat, stroke, mounting diseases, and gynecological diseases to name just a few. It is presented in 25 chapters, most of which deal with two or three closely related diseases; however, the final three chapters cover miscellaneous formulas and foodstuffs. Each chapter includes an introduction to the material followed by the original lines of the text, which are rendered in simplified Chinese characters, Pinyin, and English translation. This is followed by notes to elucidate obscure phrases in the original text, a synopsis of the content of the line, and detailed explanatory commentaries. Textual History from the Introduction by Sabine Wilms. As its title suggests, Zhang's *Sheng Huo Lun* discusses the diagnosis and treatment of cold-damage conditions, which are conditions related to external contraction, especially of wind and cold. His *Jin Gu Yao Lue* is thought to reflect that section of the original *Sheng Huo Zhen Ben Lun* that was called miscellaneous diseases, *zhen ben*, basically a catch-all phrase for any conditions which could not be traced to externally contracted evils. The full title of this present text is *Jin Gu Yao Lue Feng Lin Essential Prescriptions and Discussions from the Golden Cabinet*. This title tells us several things about the book. First, it is an indication of the value that the author or, more accurately, the person who named the text as such, placed on the book's content. Golden Cabinet refers to a cabinet-like storage box made of gold; hence, a place where a person of great wealth would store his or her most valuable items. Second, the text is characterized as containing both prescriptions and discussions, or in other words, clinical as well as theoretical information. This combination positions it at an interesting fulcrum in the textual history of Chinese medicine, namely the intersection between theoretical classics like the *Huangdi Neijing* (Yellow Emperor's Inner Canon) and *Nanjing* (Classic of Difficult Issues), which were mostly concerned with the flow of qi and blood through the vessels and the correlation of the human body to the macrocosm, and formulary collections like the *Qin Jiefu* (Qin's Thousand Gold Pieces Prescriptions) by Shen Si-miao, which primarily matched lists of symptoms to specific formulas without providing any diagnostic or etiologic explanation for the rationale behind a treatment. By contrast, the *Jin Gu Yao Lue* includes detailed diagnostic guidelines and etiologic reasoning in addition to instructions for treatment, primarily with medicinal formulas, and some references to acupuncture, moxibustion, and other therapeutic modalities. Zhang's *Sheng Huo Lun* thus created a medical classic with outstanding significance for both theory and practice centuries before other medical authors attempted to follow in his footsteps during the Song period. Due to the turbulence of its historical times, it is impossible to reconstruct the exact

format content and organization of Zhong Nong Jing's work today. Nevertheless its significance for the history of medicine and its applicability in modern clinical practice has inspired much research especially in China to approximate its original form as much as possible on the basis of later reprints fragments that have been recovered in China and Japan in archaeological sites and quotations in received texts. By order of the Song Imperial court in the 11th century both the Sheng Huo Lun and the Jing Gu Yao Lu were included among a small selection of early Chinese medical classics to be collated annotated and reissued in woodblock print. This monumental effort was completed by a large editorial team from the Office for the Correction of Medical Texts which had been established in 1057 CE. While these scholars had access to the ten scrolls of the Sheng Huo Lun which had been edited by Wang Shihong the part on miscellaneous diseases had not survived. Instead they painstakingly had to recreate the Jing Gu Yao Lu on the basis of quotations found in other medical classics like the Miji Pulse Canon, Zhubi Jing, Yuhuan Lun, Origin and Indicators of Disease, and Qinjiefang Thousand Gold Pieces Prescriptions as well as a summary of Zhong Nong Jing's work in three scrolls entitled Jing Gu Yao Lu Fajing Essential Prescriptions from the Golden Cabinet and Jade Sheath. These Song editors matched the prescriptions with the descriptions of symptoms arranged the text by disease categories into 25 chapters in three parts and lastly added select outstanding prescriptions by other physicians of the times all with the goal of making this text as clinically useful as possible. This Song revision has been the standard version of the text ever since and also the version on which subsequent editions such as this one are based. It is thus important for the discerning reader to keep in mind that we are looking at a Han dynasty text that was lost for several centuries and reconstructed rearranged and supplemented by Song dynasty scholars approximately eight hundred years later. Praise for Jin Gui Yao Lue Essential Prescriptions from the Golden Cabinet. Wiseman and Wilms have exquisitely translated the Jing Gu Yao Lu. The English rendering is impeccable precise and consistent. The detailed commentaries are systematic and comprehensive. Throughout my forty six years as a clinician I have studied Zhong Nong Jing's writings and prescribed formulas from the Sheng Huo Lun and Jing Gu Yao Lu. I hope that this remarkable work in its English translation will help you to draw upon the genius of Zhong Nong Jing and to understand and utilize the depth of his knowledge of Chinese medicine.
