Mother Nature Maternal Instincts And How They Shape The Human Species:

Mother Nature Sarah Blaffer Hrdy, 1999 We are tempted to think of maternal instinct as a quality a woman has or lacks But the belief that mothers instinctively nurture their offspring one of the West's most cherished ideals and a view widely accepted even in scientific circles has become increasingly controversial Mother Nature presents a radical new way of understanding how mothers act and why and how this new understanding is changing the way scientists think about how evolution works Drawing on anthropology history literature developmental psychology and animal behavior Sarah Hrdy examines the distinct biological and genetic elements that constitute maternal instinct She strips away the biases implicit in conventional stereotypes of female nature to give us very different and provocative perspectives on maternal ambivalence the links between maturity and ambition mother love and sexual love and why age old tensions between the sexes persist and are being played out today in efforts to control women's reproductive choices Combining decades of research with her own experience as a mother Hrdy makes clear in this remarkable book what it means from a historical and evolutionary perspective to be a mother and explains how this knowledge has transformed our understanding of human development and behavior

Mother Nature Sarah Blaffer Hrdy, 2000 **Women's Reproductive Mental Health Across the Lifespan** Diana Lynn Barnes, 2014-05-30 In this book you'll find a thoughtfully edited chronicle of the unique convergence of genetic hormonal social and environmental forces that influence a woman's mental health over the course of her life Both comprehensive and nuanced Women's Reproductive Mental Health Across the Lifespan captures the science clinical observation and collective wisdom of experts in the field Professionals and laypersons alike are well advised to make room on their bookshelves for this one Margaret Howard Ph D Warren Alpert Medical School of Brown University Women Infants Hospital Providence RI This outstanding collection of work is an important timely and much needed resource Dr Diana Lynn Barnes has been instrumental in bringing attention to the needs of perinatal women for decades In Women's Reproductive Health Across the Lifespan she brilliantly unites the medical world of reproductive life events with the psychiatric and psychological world of mental health issues associated with them Her expertise combined with contributions by distinguished leaders in the field create a volume of work that should be studied carefully by every medical and mental health provider who works with women Karen Kleiman MSW The Postpartum Stress Center Author of Therapy and the Postpartum Woman Finally a book that addresses the entire scope of women's reproductive mental health spanning the gamut from puberty to menopause The list of chapter contributors reads like a who's who of international experts Unique to this book is its focus on the interaction of genetics hormonal fluctuations and the social environment It is a must addition for the libraries of clinicians and researchers in women's reproductive mental health Cheryl Tatano Beck DNSc CNM FAAN Board of Trustees Distinguished Professor School of Nursing University of Connecticut Pregnancy and childbirth are generally viewed as joyous occasions Yet for numerous women these events instead bring anxiety depression and emotional distress Increased interest

in risk reduction and early clinical intervention is bringing reproductive issues to the forefront of women's mental health. The scope of Women's Reproductive Mental Health across the Lifespan begins long before the childbearing years and continues well after those years have ended. Empirical findings, case examples, and dispatches from emerging areas of the field illuminate representative issues across the continuum of women's lives with the goal of more effective care benefitting women and their families. Chapter authors discuss advances in areas such as fertility treatment and contraception and present current thinking on the psychological impact of pregnancy loss, menopause, cancer, and other stressors. These expert contributors emphasize the connections between an individual's biology and psychology and cultural expectations in shaping women's mental health and the balance between a client's unique history and current clinical knowledge. Clinicians need to address disorders included in the coverage: The experience of puberty and emotional wellbeing, Body image issues and eating disorders in the childbearing years, Risk assessment and screening during pregnancy, Normal and pathological postpartum anxiety, Mood disorders and the transition to menopause, The evolution of reproductive psychiatry. A reference with an extended shelf life. Women's Reproductive Mental Health across the Lifespan enhances the work of researchers and practitioners in social work, clinical psychology, and psychiatry and has potential relevance to all health care professionals.

The Psychology of Women and Gender Nicole M. Else-Quest, Janet Shibley Hyde, 2021-01-04. A psychology of women textbook that fully integrates transgender research issues and concerns. With clear, comprehensive, and cutting-edge coverage. *The Psychology of Women and Gender: Half the Human Experience* delivers an authoritative analysis of classical and up-to-date research from a feminist psychological viewpoint. Authors Nicole M. Else-Quest and Janet Shibley Hyde examine the cultural and biological similarities and differences between genders, noting how these characteristics can affect issues of equality. Students will come away with a strong foundation for understanding the dynamic influences of gender, sexual orientation, and ethnicity in the context of psychology and society. The Tenth Edition further integrates intersectionality throughout every chapter, updates language for more transgender inclusion, and incorporates new content from guidelines put forth from the American Psychological Association.
