The Moment of Speech Annie Morrison, 2021-11-18 Annie Morrison creator of the Morrison Bone Prop abandons the notion that language and thought are mainly processed in the left cerebral hemisphere and coaches the actor to speak from the heart Through this method words acquire physical properties such as weight texture colour and kinetic force Think about Martin Luther King Mao Zedong or Malala Yousafzai potent speech impacts external events And internally it forms and shapes the world of the speaker Seeing articulation as a purely mechanical skill is detrimental to an actor's process it is crucial to understand what language is doing on a biological level This workbook is invaluable for actors both professional and in training and also for voice and speech teachers Catalogue of high-school and college textbooks Ginn and Company, 1911

Literacy and Power Hilary Janks, 2009-10-16 Hilary Janks addresses key questions about literacy and power in this landmark text that is both engaging and accessible Her central argument is that competing orientations to critical literacy education domination power access diversity design foreground one over the other but are crucially interdependent and need to work together to create possibilities for redesign and social action that serve a social justice agenda She examines the theory underpinning each orientation and develops new theory in the argument for interdependence and integration Sitting at the interface between theory and practice constantly moving from one to the other the text is rich with examples of how to use these orientations in real teaching contexts and how to use them to counterbalance one another In the groundbreaking final chapter Janks considers how the rationalist underpinning of critical literacy tends to exclude the non rational shows ways of working beyond reason pleasure and play desire and the unconscious and makes the case that these need to be taken seriously given their power to cut across the work of critical literacy educators working from any orientation *Researcher's Guide to HUD Data, with Notes on Related Information Sources* United States. Language Learning, Power, Race and Identity Liz Johanson Botha, 2015-07-02 This book investigates the strategies and identities of colonials who have learned the languages of colonised people using the context of isiXhosa in South Africa While power in language learning research has traditionally focused on the powerful native speaker and the relatively disempowered learner this book studies the inverse where elites are the language learners The author analyses the life histories of four white South Africans who acquired isiXhosa during the apartheid years The book offers insights into relationships between language power race identity and change in their stories and in the broader context of apartheid and post apartheid South Africa with its conflicted history and disparities This
