Parish,2014-06-03 This book breaks the ground in Geographical texts by transcending a strictly regional or topical focus It presents the opportunities and constraints that mountains and their resources offer to local and global populations the impacts of environmental and economic change development and globalisation on mountain environments Part of the Ecogeography series edited by Richard Hugget *The Future of Mountain Agriculture* Stefan Mann,2012-11-08 Mountain agriculture is a socially and culturally unique system but also a regionally important economic sector In a globalising world it is clear that fertile areas on all continents will always be used to produce large quantities of agricultural products in order to feed the world and increasingly provide biomass as a source of energy It is far less clear however how land use in steep and more peripheral regions will evolve By definition farmland in mountain areas is more difficult to work because of steep slopes and missing accessibility Climate conditions and poor soil quality often add to these adverse conditions Through overcoming limited views from one region only or from one discipline this book intends to draw a first truly international perspective on the issue of mountain farming Fundamentals of the Physical Environment Peter Smithson,Ken Addison,Ken
