Contexts and Dialogue Tao Jiang, 2006-11-30 Are there Buddhist conceptions of the unconscious If so are they more Freudian Jungian or something else If not can Buddhist conceptions be reconciled with the Freudian Jungian or other models These are some of the questions that have motivated modern scholarship to approach *layavij na* the storehouse consciousness formulated in *Yog c ra* Buddhism as a subliminal reservoir of tendencies habits and future possibilities Tao Jiang argues convincingly that such questions are inherently problematic because they frame their interpretations of the Buddhist notion largely in terms of responses to modern psychology He proposes that if we are to understand *layavij na* properly and compare it with the unconscious responsibly we need to change the way the questions are posed so that *layavij na* and the unconscious can first be understood within their own contexts and then recontextualized within a dialogical setting In so doing certain paradigmatic assumptions embedded in the original frameworks of Buddhist and modern psychological theories are exposed Jiang brings together Xuan Zang s *layavij na* and Freud s and Jung s unconscious to focus on what the differences are in the thematic concerns of the three theories why such differences exist in terms of their objectives and how their methods of theorization contribute to these differences *Contexts and Dialogue* puts forth a fascinating erudite and carefully argued presentation of the subliminal mind It proposes a new paradigm in comparative philosophy that examines the what why and how in navigating the similarities and differences of philosophical systems through contextualization and recontextualization

empirical research in the psychological sciences Further emphasis is placed on current trends in the areas of clinical and cognitive psychology and on the Mahayana Buddhist understanding of consciousness with reference to certain developments in consciousness studies and physics A welcome addition to the current literature the works in this remarkable volume ably demonstrate how Buddhist principles can be used to develop a deeper understanding of the human condition and behaviours that lead to a balanced and fulfilling life
