Authors Denise Guinn and Rebecca Brewer have drawn on their 14 years of experience with the one term course to write a textbook that incorporates biochemistry and organic chemistry throughout. Each chapter emphasizes cases related to allied health and provides students with the practical quantitative skills they will need in their professional lives. Essentials of General Organic and Biochemistry captures student interest from day one with a focus on attention getting applications relevant to health care professionals and as much pertinent chemistry as is reasonably possible in a one term course. Students value their experience with chemistry getting a true sense of just how relevant it is to their chosen profession.
