Voltaire once said: "Happy is the man who has his own garden, and true contentment is when he grows things in it." Having your own garden may not be possible for many of us today, busy in the rat race of the 21st century. Nevertheless, there are still many people fortunate enough to have open land outside their houses where they can make their own flower gardens or kitchen gardens. This book is going to tell you how to make an organic kitchen garden for pleasure and also for profit. Just like any other garden, a little bit of planning has to go into making your vegetable garden. It should have sufficient paths in it so that you can wheel about manures etc. in barrows if necessary. You may also want to remove all the green vegetable rubbish accumulating while gardening. There is absolutely no need for your garden to be all paths if it is pocket sized and you are strapped for space. In small gardens, one path at one side is more than enough. Whatever the size of your organic vegetable garden may be, this book is going back to traditional methods of growing vegetables in a healthy manner. We are not talking about chemical fertilizers and poisonous pesticides. Instead, we are going to talk about natural manure, compost, and other traditional methods used by our forefathers to get a good healthy crop for family and neighbors. Many people out there would not want to grow all kinds of vegetables because hey, how many of us like eating greens? But then the moment we see them growing in our gardens and we pluck our first harvest, we begin to think in terms of healthy eating, especially when the meals have been made of organic vegetables grown in our own backyard. Your main priority is to see that the ground is fully occupied for most of the year and that no part of your garden is wasted. Think Japanese gardens. They know how to utilize every single inch of space and get the most out of it. All right, you may see their gardens on a small scale, but no inch of soil in a farm is left uncultivated if they can help it. This may look crowded, but it is not. So let us consider ourselves gardening.
