

Relationships Within an Ecosystem

Predation – where a **predator** (an organism that is hunting) feeds on its **prey** (the organism that is attacked).

Parasitism – non mutual relationship between organisms of different species where one organism, parasite, benefits at the expense of the other, the host

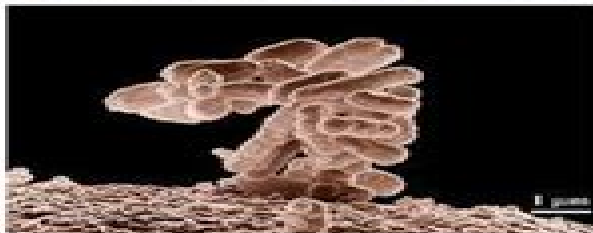

Commensalism – relationship between two organisms where one organism benefits but the other is neutral (there is no harm or benefit)

Predation – the way two organisms of different species biologically interact in a relationship in which each individual derives a fitness benefit (i.e., increased or improved reproductive output).

Competition – These interactions cause competition among organisms and helps determine survival or extinction.

Microorganisms – These organisms interact with others as well and cause diseases, aid organisms, and disrupt ecosystems as well over time.
