Written with empathy and humility, *Humanizing Addiction: Blending Science and Personal Transformation* provides a compelling argument and framework for integrating humanism with empirically grounded practices. This important book is an invaluable resource for healers from a range of backgrounds: physicians, physician assistants, nurse practitioners, social workers, case managers, patient navigators, clinical and health psychologists, pharmacists, counselors, graduate students and medical trainees involved in clinical care of people with addiction and substance use problems. [New Directions in Behavioral Intervention](#)

[Development for Pediatric Obesity, An Issue of Pediatric Clinics of North America](#) Sylvie Naar-King, 2016-07-06 Almost one out of every three US children is overweight or obese, with minority youth at highest risk. There are limited efficacious pediatric obesity interventions available for clinicians and successful weight loss trials for minority youth are rare. Even fewer interventions have been shown to significantly improve clinical health outcomes such as adiposity, blood pressure and cholesterol level, and maintenance of behavior change over the long term remains a challenge. Translation of research in which bench findings are applied to the bedside is uncommon in the behavioral arena. Thus, advances in our understanding of fundamental human processes such as motivation, emotion, cognition, self-regulation, decision-making, stress and social networks are not being optimally applied to our most pressing behavioral health problems. This issue of *Pediatric Clinics* will focus on promising behavioral treatments in the pipeline that have been translated from basic behavioral science and are the process of refinement and proof of concept testing. **Finding Your Way to Change** Allan Zuckoff, Bonnie

Gorscak, 2015-05-14 I know this change would be good for me but I just can't seem to commit to it. Whether it's eating healthier, making a long desired career change or ending self-destructive patterns in relationships, old habits die hard. The good news is it's perfectly normal to feel stuck and with motivational interviewing (MI) you can understand what's keeping you there and how to break free. Allan Zuckoff and Bonnie Gorscak are MI experts who translate this proven counseling approach into powerful self-help strategies and practical tools. Readers learn how to deal with unhelpful pressure to change both from others and from within, overcome self-judgment and shame and build confidence for developing and carrying out a doable personal change plan. Vivid stories illustrate the techniques in action. Purchasers get access to a Web page where they can download more than 60 worksheets and have the option to fill in forms on screen before printing and/or saving.
