## **Nonprofits in Urban America** Cynthia Jackson-Elmoore,Richard C.

Hula,2000-09-30 From their experience in nonprofit operations and their understanding of the realities of urban politics the editors of this wide ranging volume and their contributors dig into issues seldom explored in the literature They study the role of nonprofits in local governing coalitions the potential of nonprofits to replace social welfare programs their efforts to restructure key elements of the local political process and the unanticipated internal impacts of the changing roles of

nonprofit organizations in the urban community The result is a compelling argument that to understand life in contemporary American cities we must take into account the expanding role of nonprofit organizations their response to increased service demands and their participation in common efforts to direct policy choices Hula Jackson Elmoore and their panel of scholars researchers and close observers of urban policymaking focus on the delivery of social services to illustrate the complex and important set of roles that nonprofits have assumed As social programs are cut at all levels of government it is often believed that nonprofits can and should take up the slack and restore at least some portion of the cutbacks in such services They examine how some nonprofit organizations have taken a proactive stance in this regard by implementing efforts that do not simply react to political and social change but attempt to initiate and guide it instead They attempt to change the political environment in which they operate and the result has been to change the face of local politics in many jurisdictions Each chapter of their book explores these expanding and emerging roles Themes and focuses vary which in turn reflects the variation and complexity within the nonprofit sector itself At the same time each chapter presents an emerging political or policy role now being played by today s nonprofits and voluntary associations and a theoretical context in which such activities and behavior can best be understood Scholars and advanced students in public administration economics and nonprofit management as well as executive level nonprofit managers will find here an important update on what is happening in their special worlds and the knowledge they need to make sense of it

**Capitalism** Allan Kulikoff, 1992 Allan Kulikoff's provocative new book traces the rural origins and growth of capitalism in America challenging earlier scholarship and charting a new course for future studies in history and economics. Kulikoff argues that long before the explosive growth of cities and big factories capitalism in the countryside changed our society the ties between men and women the relations between different social classes the rhetoric of the yeomanry slave migration and frontier settlement. He challenges the received wisdom that associates the birth of capitalism wholly with New York Philadelphia and Boston and show how studying the critical market forces at play in farm and village illuminates the defining role of the yeomen class in the origins of capitalism.

#### **National Geographic Voices from Colonial America:**

**Pennsylvania 1643-1776** Lisa Trumbauer, 2005 Presents the history of Pennsylvania Colony and William Penn a proprietor of the English Colony. *Making Good Neighbors* Abigail Perkiss, 2014-03-20 In the 1950s and 1960s as the white residents real estate agents and municipal officials of many American cities fought to keep African Americans out of traditionally white neighborhoods Philadelphia's West Mount Airy became one of the first neighborhoods in the nation where residents came together around a community wide mission toward intentional integration. As West Mount Airy experienced transition homeowners fought economic and legal policies that encouraged white flight and threatened the quality of local schools seeking to find an alternative to racial separation without knowing what they would create in its place. In *Making Good Neighbors* Abigail Perkiss tells the remarkable story of West Mount Airy drawing on archival research and her oral history interviews with residents to trace their efforts which began in the years following World War II and continued through the turn of the twenty first century. The organizing principles of neighborhood groups like the West Mount Airy Neighbors Association WMAN were fundamentally liberal and emphasized democracy equality and justice the social cultural and economic values of these groups were also decidedly grounded in middle class ideals and white collar professionalism. As Perkiss shows this liberal middle class framework would ultimately become contested by more militant black activists and from within WMAN itself as community leaders worked to adapt and respond to the changing racial landscape of the 1960s and 1970s. The West Mount Airy case stands apart from other experiments in integration because of the intentional organized and long term commitment on the part of WMAN to biracial integration and in time multiracial and multiethnic diversity. The efforts of residents in the 1950s and 1960s helped to define the neighborhood as it exists today.

**Max Weber in America** Lawrence A. Scalf, 2011-01-10 Max Weber widely considered a founder of sociology and the modern social sciences visited the United States in 1904 with his wife Marianne. The trip was a turning point in Weber's life and it played a pivotal role in shaping his ideas yet until now virtually our only source of information about the trip was Marianne Weber's faithful but not always reliable 1926 biography of her husband Max Weber in America carefully reconstructs this important episode in Weber's career and shows how the subsequent critical reception of Weber's work was as American a story as the trip itself. Lawrence Scalf provides new details about Weber's visit to the United States.
