Organization And Decision Theory Recent Economic Thought:

Organization and Decision Theory Ira Horowitz, 2012-12-06 Ira Horowitz Depending upon one's perspective the need to choose among alternatives can be an unwelcome but unavoidable responsibility an exciting and challenging opportunity a run of the mill activity that one performs seemingly without thinking very much about it or perhaps something in between Your most recent selections from a restaurant menu from a set of jobs or job candidates or from a rent or buy or sell or lease option are cases in point Oftentimes we are involved in group decision processes such as the choice of a president wherein one group member's unwelcome responsibility is another's exciting opportunity Many of us that voted in the presidential elections of both 1956 and 1984 irrespective of political affiliation experienced both emotions others just pulled the lever or punched the card without thinking very much about it Arriving at either an individual or a group decision can sometimes be a time consuming torturous and traumatic process that results in a long regretted choice that could have been reached right off the bat On other occasions the just let's get it over with and get out of here solution to a long festering problem can yield rewards that are reaped for many 1 ORGANIZATION AND DECISION THEORY 2 years to come One way or another however individuals and organizations somehow manage to get the decision making job done even if they don't quite understand and often question just how this was accomplished
