Corporate Behavior and Sustainability Güler Aras, Coral Ingle, 2016-10-04

Companies can no longer expect to engage in dubious or unethical corporate behaviour without risking their reputation and damaging perhaps irrevocably their market position Irresponsible corporate behavior not only deprives shareholders of long term returns but also ultimately imposes a cost on society as a whole Sustainable business is about ensuring that entities contribute toward positive social environmental and economic outcomes Bad business behaviour is costly for stakeholders for markets for society and the economy alike To ensure that a company behaves well the buy in of the leadership team is crucial The full

commitment of the board of directors in conjunction with the senior managers of the organization is required if an organization is to be socially responsible. In this sense leadership does not reside with an individual the CEO within the organization but with all of those at the apex of corporate power and control. Effective change management requires enlightened and capable leadership to instigate and drive the process of embedding a sustainable and socially responsible corporate philosophy and culture that supports good business decision making. A profound understanding of the requirements of such a leadership process will help corporate managers become highly effective change agents. Governance will be the main driver of this change. For the economy and financial markets to become sustainable and resilient radical changes in corporate leadership need to take place. Integrated reporting, government regulation and international standards will all be important factors in bringing about this change. As well as understanding the effects of corporate behavior on financial markets such an understanding is also now imperative in relation to the social and environmental contexts.

Management Scholarship and Organisational Change Miriam Green, 2019-01-08. Change is a crucial and inescapable process for many organisations. It remains a constant challenge for managers and many change management initiatives fail. Burns and Stalker's seminal text on managing change, *The Management of Innovation*, has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks. The issues raised in that book are still being grappled with by academics and practitioners today. Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text. The main thesis of her book is that this literature though valuable does not provide a full picture. Its objectivist approach ignores the role of other factors raised in the original study. These factors include the effects of power, politics, resistance and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners. This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods. The originality of this book lies in its in depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in depth analysis of the ways this work has been represented and used as a basis for teaching and research. It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change. It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics, managers and other organisational stakeholders.

[The International Journal of Indian Psychology, Volume 3, Issue 3, No. 4](#) IJIP.In, 2016-05-22. This gives me an immense pleasure to announce that RED SHINE Publication Inc is coming out with its third volume of peer reviewed international journal named as *The International Journal of Indian Psychology*.
