**Perspectives on Change** Bernard Burnes, Julian Randall, 2015-11-19 Despite the plethora of books on change there appears to be a notable gap in the field rarely is the authentic and candid voice of change practitioners heard Seldom are those most closely involved in the management of change given or seek the opportunity to write about their personal experiences and reflexivity Nor is this just a case of practicing managers not being given a voice or feeling that they cannot be frank and open about what they do How often do academics candidly state what they actually do when they are faced with managing change in their own institutions or when they are called on in a consultancy capacity Similarly it is rare for full time consultants to be candid

about what it is they actually do instead they tend to have a well honed sales pitch which lays out a logical change process directed at helping the client to achieve success Yet when academics consultants and practicing managers are prepared to speak candidly about what they really do a richer messier but more illuminating picture of change emerges The aim of Perspectives on Change is to move beyond the do as I say approach of most change books and to encourage academics consultants and managers to say candidly what it is they really do and what they really think about change and how it should be managed The Editors of this book Burnes and Randall have over 60 years of experience between them of studying and teaching change management acting as consultants and actually managing change projects They are therefore well aware of the differences and contradictions between what academics consultants and managers say about change in public and what they say in private and do in practice Perspectives on Change will offer students and practitioners of change a unique opportunity to understand change in practice In addition it will also contribute to the Rigour Relevance debate by giving a different and perhaps more realistic perspective on the nature of the gap between theory and practice
