beneficial for children's mental health. Creating something and receiving praise for it boosts their confidence and sparks their interests for trying new things. There's nothing wrong with letting your child play games on your phone, tablet, or laptop. But every now and then it's good for them to try out new things away from the screens. Technology provides them with a finished product: a game, a cartoon, a movie, but real creativity happens when kids have to create something using only their hands and minds. Try this old Japanese technique and watch your child's dexterity and creativity flourish.
