Origin Science A Proposal For The Creation Evolution Controversy:

The Creation/Evolution Controversy Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology

Scientists Confront Intelligent Design and Creationism Andrew J. Petto, Laurie R. Godfrey, 2007. With the pseudoscience of creationism rising again under the guise of intelligent design, this powerful collection eviscerates the new assault on evolution and reveals the pervasive and insidious threat posed to genuine science by ID proponents like Phillip Johnson, Michael Behe, and William Dembski. The sixteen original essays address two key issues: the overwhelming scientific evidence for evolution gathered over 150 years and the dubious underpinnings of creationism and how society can mount better educational and legal policies to prevent a theological takeover of our public and scientific institutions. The book includes powerful voices in the modern culture war against ID, including Kevin Padian, paleontologist and expert witness in the landmark lawsuit of *Kitzmiller v. Dover*. With creationist arguments forever morphing and reappearing under new aliases, this new confrontation is a must read for teachers, students, and general readers and a ringing and lasting refutation of creationism's fraudulent claims.

Origin Science Norman L. Geisler, J. Kerby Anderson, 1987. *Creation and the Courts (With Never Before Published Testimony from the "Scopes II" Trial)* Norman L. Geisler, 2007-04-23. With the explosion of the Intelligent Design movement, many Americans are once again forced to take sides in the long-standing battle between creation and evolution. Yet many feel inadequately educated on the judicial process of this battle. In *Creation and the Courts*, Norman Geisler offers a behind-the-scenes look at the testimonies and arguments of the prosecution and defense of the major creation versus evolution court battles. Geisler offers a compelling look at the erosion of Christian influence in America's public schools. *Creation and the Courts* encourages readers to learn from the past judicial fights and to take their rightful places in the battle. These conflicts in today's classrooms and courtrooms must continue to be fought, and anyone willing to be a soldier must be equipped with the knowledge found in this book.

Evolution vs. Creationism Eugenie C. Scott, 2008-12-30. The evolution versus creationism conflict is here to stay. Even after their devastating defeat in the *Kitzmiller v. Dover* decision, advocates of intelligent design and other forms of creationism continue to revise their strategies for undermining the teaching of evolution and thus of science in general in American schools. In this revision of *Evolution vs. Creationism*, Eugenie Scott, one of the leading proponents of teaching evolution in the schools, describes these ever-changing efforts to undermine science education and shows what students, parents, and teachers should be aware of to help ensure that American science education prepares our students to compete in the 21st century. This second edition of *Evolution vs.*

Creationism will help readers better understand the issues involved in these debates It expands and updates the original work with an insider's look at the Kitzmiller v Dover trial a new selection of primary source documents on the Creationism Evolution controversy in the media and an up to date analysis of the most recent creationist challenges across the country The revision also expands and updates the collection of primary source documents that address cosmology law education popular culture and religious issues from all sides of the debate as well as the resources for further information
