**Out of the Closet, Into the Archives** Amy L. Stone,Jaime Cantrell,2015-11-20 Finalist for the 2016 Lambda Literary Award in LGBT Anthology presented by the Lambda Literary Foundation Out of the Closet Into the Archives takes readers inside the experience of how it feels to do queer archival research and queer research in the archive The archive much like the closet exposes various levels of public and privateness recognition awareness refusal impulse disclosure framing silence cultural intelligibility each mediated and determined through subjective insider outsider ways of knowing The contributors draw on their experiences conducting research in disciplines such as sociology African American studies English communications performance studies anthropology and women s and gender studies These essays challenge scholars to engage with their affective experience of being in the archive illuminating how the space of the archive requires a different kind of deeply personal embodied research Out of the Closet Into the Archives represents the exciting directions for scholarship enabled by this rapid growth of new LGBTQ archives Although mindful of critiques of the archive as an institution of power and attentive to experiences and ephemerality that can escape it the essays published here practice forms of the archival turn that put relentless curiosity and unapologetic passion to use as methods for intellectual invention from the Foreword by Ann Cvetkovich

**Archives and New Modes of Feminist Research** Maryanne Dever,2020-04-28 In an era when the metaphor of the archive is invoked to cover almost any kind of memory collection or accumulation it is important to re examine what is entailed politically and methodologically in the practice of feminist archival research This question is central not only to the renewed interest many disciplines are showing in empirical research in archives but also given the current explosion of online social and cultural data which has fundamentally transformed what we understand an archive to be Contributors in this collection are keen to mark out what may be novel and what is enduring in the ways in which feminist thought and feminist practice frame archives Importantly they engage with archives in their historical and political complexity rather than treating them as simple repositories of source material In this respect contributors are keenly interested in what it means to archive particular materials and not simply in what those materials may hold for feminist researchers The collection features established and emerging feminist scholars and brings together interventions from across such disciplines as history literature modernist studies cinema studies and law This book was originally published as a special issue of the journal Australian Feminist Studies

Moving Archives Linda M. Morra,2020-01-15 The image of the dusty undisturbed archive has been swept away in response to growing interest across disciplines in the materials they house and the desire to find and make meaning through an engagement with those

materials Archival studies scholars and archivists are developing related theoretical frameworks and practices that recognize that the archives are anything but static Archival deposits are proliferating and the architects practitioners and scholars engaged with them are scarcely able to keep abreast of them Archives archival theory and archival practice are on the move But what of the archives that were once safely housed and have since been lost or are under threat What of the urgency that underscores the appeals made on behalf of these archives As scholars in this volume argue archives their materialization their preservation and the research produced about them are moving in a different way they are involved in an emotionally engaged and charged process one that acts equally upon archival subjects and those engaged with them So too do archives at once represent members of various communities and the fields of study drawn to them Moving Archives grounds itself in the critical trajectory related to what Sara Ahmed calls affective economies to offer fresh insights about the process of archiving and approaching literary materials These economies are not necessarily determined by ethical impulses although many scholars have called out for such impulses to underwrite current archival practices rather they form the crucial affective contexts for the legitimization of archival caches in the present moment and for future use The Hirschfeld Archives Heike Bauer, 2017-05-15 This work examines how death suicide and violence shaped modern queer culture arguing that negative experiences as much as affirmative subculture formation influenced the emergence of a collective sense of same sex identity Bauer looks for this history of violence in the work and reception of the influential sexologist Magnus Hirschfeld 1868 1935 and through Hirschfeld's work examines the form and collective impact of anti queer violence in the first half of the twentieth century Hirschfeld's archive his library at the Institute for Sexual Sciences in Berlin was destroyed by the Nazis in 1933 so the archive of Bauer's title is one that she's built from over a hundred published and unpublished books articles films and photographs The Materiality of the Archive Sue Breakell, Wendy Russell, 2023-10-30 The Materiality of the Archive is the first volume to bring together a range of methodological approaches to the materiality of archives as a framework for their engagement analysis and interpretation Focusing on the archives of creative practices the book reaches between and across existing bodies of knowledge in this field including material culture art history and literary studies unified by an interest in archives as material deposits and aggregations in both analogue and digital forms as well as the material encounter Connecting a breadth of disciplinary interests in the archive with expanding discourses in materiality contributors address the potential of a material engagement to animate archival content Analysing the systems processes and actions that constitute the shapes forms and structures in which individual archival objects accumulate and the underpinnings which may hold them in place as an archival body the book considers ways in which the inexorable move to the digital affects traditional theories of the physical archival object It also considers how stewardship practices such as description and metadata creation can accommodate these changes The Materiality of the Archive unifies theory and practice and brings together professional and academic perspectives The book is essential reading for academics researchers and
