primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It
must be emphasized that this work is essentially as history of the process of educational technology rather than of products
in the form of devices or media Although media have played an important role in educational technology the reader should
not lose sight of the central process which characterizes and underlies the true historical meaning and function of
educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the
heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of
past history in planning for the present or the future A related purpose of this book is to provide a selective survey of
research in educational technology as it relates to the American public schools Such research reviews are not intended to be
comprehensive but were included because of their historical importance and their relevance in understanding the process of
educational technology **American Universities and Colleges** ,2014-10-08 No detailed description available for
