Other Space Race Eisenhower Transforming:

The Other Space Race Nicholas Michael Sambaluk,2015-12-15 The Other Space Race is a unique look at the early U S space program and how it both shaped and was shaped by politics during the Cold War Eisenhower s New Look expanded the role of the Air Force in national security and ultimately allowed ambitious aerospace projects namely the Dyna Soar a bomber equipped with nuclear weapons that would operate in space Eisenhower s space policy was purely practical creating a strong deterrent against the use of nuclear arms against the United States With the Soviet launch of Sputnik in 1957 the political climate changed and space travel became part of the United States national discourse Sambaluk explores what followed including the scuttling of the Dyna Soar program and the transition from Eisenhower s space policy to John Kennedy s This well argued well researched book gives much needed perspective on the Cold War s influence on space travel and it s relation to the formation of public policy *Always at War* Melvin G. Deaile,2018-04-15 Always at War is the story of Strategic Air Command SAC during the early decades of the Cold War More than a simple history it describes how an organization dominated by experienced World War II airmen developed a unique culture that thrives to this day Strategic Air Command was created because of the Air Force s internal beliefs but the organization evolved as it responded to the external environment created by the Cold War In the aftermath of World War II and the creation of an independent air service the Air Force formed SAC because of a belief in the military potential of strategic bombing centralized under one commander As the Cold War intensified so did SAC s mission In order to prepare SAC s warriors to daily fight an enemy they did not see as well as to handle the world s most dangerous arsenal the command led by General Curtis LeMay emphasized security personal responsibility and competition among the command Its resources political influence and manning grew as did its culture until reaching its peak during the Cuban Missile Crisis SAC became synonymous with the Cold War and its culture forever changed the Air Force as well as those who served *An Untaken Road* Steven A Pomeroy,2016-01-15 Steven A Pomeroy has authored the first history of the American mobile intercontinental ballistic missile ICBM a technology the United States spent four decades and billions of dollars creating but never deployed An Untaken Road showcases how the evolution of a technology that ultimately never existed and the politics that surrounded it end up significantly shaping American nuclear strategy and forces for decades Utilizing recently declassified documents years of experience and an unrivaled passion for the history of military technologies Pomeroy has created a new framework on the nature of strategic weapons technology innovation This thorough study of a road not taken is a must read for those seeking to understand the challenges and constraints on U S military weapon programs especially when inter organization competition domestic politics strategic needs and new technologies collide **The Cool War** Sean M. Maloney,2025-10-14 Sean Maloney reveals how Vladimir Putin has aggressively leveraged nuclear signaling to manipulate NATO and deter Western intervention in Ukraine With Cold War level brinkmanship and modern information warfare Russia s tactics have reshaped the strategic landscape and raised

urgent questions about how long the West can hold the line Nuclear signaling is defined as the deliberate maneuvering of nuclear forces to deter and influence an adversary's actions Author Sean Maloney shows how Russian leader Vladimir Putin has systematically employed nuclear signaling to force desired behavior from both NATO and the United States This strategy has escalated greatly during the Russo Ukraine War as Putin seeks to deter Western intervention and support of Ukraine Putin uses many forms of nuclear signaling including ordering jets capable of carrying nuclear weapons to fly in western European airspace staging a joint bomber exercise with China near Alaska and instructing submarines carrying nuclear weapons to surface through the Arctic icepack The frequency of this signaling far exceeds that of similar activity during the Cold War and has escalated to more dangerous levels than before When Russia experienced setbacks on the battlefield Putin often intensified his nuclear force posturing by paring it with thinly veiled threats to use tactical nuclear weapons Maloney argues convincingly that in the post Cold War era Putin has skillfully combined his use of nuclear signaling with advances in information technology to more effectively manipulate Western nations He asserts that the United States was initially late in recognizing this development but as the situation worsened America and NATO have devised a series of responses that now hold Russia in check The question is for how long Maloney concludes that Putin's nuclear posturing has produced mixed results First and foremost Putin did successfully deter the United States and other NATO countries from outright military action in defense of Ukraine following the 2022 invasion However Russia's nuclear signaling did not prevent the West from providing weapons and intelligence to Ukraine nor did it stop NATO's expansion Nevertheless the partial success of Russia's Cold War activity does not lessen the significance of this new reality or the scope of the problems that face the West moving forward

Science, Technology and the Cultural Cold War in Asia Yuka Moriguchi Tsuchiya, 2022-07-12 Tsuchiya presents a new insight into the political roles of science and technology during the Cold War era in Asia The Cold War was not only a battle of conflicting ideologies and economic systems but also a competition of cultures and lifestyles and a battle to win the hearts and minds of people in developing countries Tsuchiya argues that science and technology were an integral part of how culture was deployed strategically She discusses the 1950s and early 1960s the Eisenhower and Kennedy presidencies in the U S and the decolonization and nation building efforts in Japan South Vietnam Burma and Indonesia She also sheds light on the way U S technological aid programs such as Foreign Atoms for Peace and the overseas information program were received by Asian leaders technocrats and scientists Provides valuable insight for scholars of Cold War History in Asia and US Foreign Policy

From Yeomanettes to Fighter Jets Randy Carol Goguen, 2024-03-06 From Yeomanettes to Fighter Jets addresses a major element of twenty first century sea power the integration of women into all military units of the U S Navy Randy Goguen delineates the cultural economic and political conditions as well as the technological changes that shaped this movement over the course of a century Starting with the establishment of the Yeomen F in World War I and continuing through today to address the current arguments over the registration of women for Selective Service and the

reform of the military justice system Goguen describes how changes in civilian society affected the U S Navy and the role of Navy women She highlights the contributions of key women and men in the military and civilian spheres who were willing to challenge convention and prejudice to advance the integration of women and make the U S Navy a stronger institution Today women in the U S Navy have proven themselves essential to the mission success of the service They are forward deployed around the world sharing the same risks as their male counterparts Some have commanded logistics and combatant ships including aircraft carriers They fly and maintain combat and patrol aircraft and serve as crew members on ships and submarines Some hold major commands ashore and have risen to the highest echelons of navy leadership Integrating women into the U S Navy has been a long and often contentious process as women strived to overcome resistance imposed by prevailing cultural and institutional norms and patriarchal prejudices Goguen a retired naval reserve officer who holds a PhD in military history from Temple University has written a comprehensive and up to date history of women s integration into the Navy She argues that throughout the process the decisive force driving progress was exigency That exigency took various forms two world wars communist expansionism in the Cold War the ending of the draft and the establishment of the All Volunteer Force as well as the political pressures posed by social change especially the mid twentieth century feminist and contemporary Me Too movements Despite a deeply ingrained institutional resistance cultivated within an insular often misogynist sea going subculture today s U S Navy could not meet its mission requirements without women Goguen asserts Exigency is the mother of integration

Training for Victory Frank Kenneth Sobchak, 2024-11-19 One of the most difficult security challenges of the post Cold War era has been stabilizing failing states in an era of irregular warfare A consistent component of the strategy to address this problem has been security force assistance where outside powers train and advise the host nation s military Despite billions of dollars spent the commitment of thousands of advisors and innumerable casualties the American efforts in Afghanistan and Iraq failed catastrophically Nevertheless among those colossal military disasters were pockets of success The Iraqi Special Operations Forces ISOF held back the Islamic State in 2014 long enough to allow American and allied forces to flow back into the country and many Afghan commando units fought to the bitter end as their country disintegrated around them What made those units successful while the larger missions ended disastrously Author Frank K Sobchak explores security force assistance across five case studies examining what factors were most critical for U S Special Forces units to build capable partners like the ISOF and the commandos More specifically the book assesses the impact of five components of Special Forces advisory missions language training and cultural awareness of the advising force the partner force to advisor ratio the advisors ability to organize host nation forces whether advisors are permitted to guide in combat and the consistency in advisor pairing Based on the experiences of U S Army Special Forces in El Salvador 1981 1991 Colombia 2002 2016 the Philippines 2001 2015 Iraq 2003 2011 and Afghanistan 2007 2021 Sobchak argues that the most crucial factors in producing combat effective partners are consistency in advisor pairing and maintaining a partner

force to advisor ratio of twelve special forces soldiers advising a company sized force or smaller Intriguingly and counter to conventional wisdom at first glance language training and cultural awareness do not seem to be critical factors as most of the Green Berets that trained units in Iraq and Afghanistan lacked both capabilities Despite an orthodoxy that argues the opposite there is little evidence that combat advising is decisive in producing effective partners and there is conflicting evidence that language training and cultural awareness are important Many of these findings while focused on Special Forces operations and doctrine could be used to improve the odds of success for larger security force assistance missions as well

Transformation of the Indian Armed Forces: 2025 Maj Gen A K Lal (Retd), 2012-05-09 Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities

Reaching for the Moon Roger D Launius, 2019-06-25 Fifty years after the Moon landing a new history of the space race explores the lives of both Soviet and American engineers At the dawn of the space age technological breakthroughs in Earth orbit flight were both breathtaking feats of ingenuity and disturbances to a delicate global balance of power In this short book aerospace historian Roger D Launius concisely and engagingly explores the driving force of this era the race to the Moon Beginning with the launch of Sputnik 1 in October 1957 and closing with the end of the Apollo program in 1972 Launius examines how early space exploration blurred the lines between military and civilian activities and how key actions led to space firsts as well as crushing failures Launius places American and Soviet programs on equal footing following American aerospace engineers Wernher von Braun and Robert Gilruth their Soviet counterparts Sergei Korolev and Valentin Glushko and astronaut Buzz Aldrin and cosmonaut Alexei Leonov to highlight key actions that led to various successes failures and ultimately the American Moon landing

Communications Satellites Joseph N. Pelton, Robert J. Oslund, Peter Marshall, 2004-09-22 Examines satellite communications the technology and the services they provide and the socio political security economic policy news entertainment and cultural impact The book addresses what satellites have been how they are designed and built how they will evolve in the future what they mean today and what they will mean tomorrow *Dark Side*

of the Moon Gerard DeGroot, 2006-11-01 A selection of the History Scientific American and Quality Paperback Book Clubs For a very brief moment during the 1960s America was moonstruck Boys dreamt of being an astronaut girls dreamed of marrying one Americans drank Tang bought space pens that wrote upside down wore clothes made of space age Mylar and took imaginary rockets to the moon from theme parks scattered around the country But despite the best efforts of a generation of scientists the almost foolhardy heroics of the astronauts and 35 billion dollars the moon turned out to be a place of magnificent desolation to use Buzz Aldrin s words a sterile rock of no purpose to anyone In *Dark Side of the Moon* Gerard J DeGroot reveals how NASA cashed in on the Americans thirst for heroes in an age of discontent and became obsessed with putting men in space The moon mission was sold as a race which America could not afford to lose Landing on the moon it was argued would be good for the economy for politics and for the soul It could even win the Cold War The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind Drawing on meticulous archival research DeGroot cuts through the myths constructed by the Eisenhower Kennedy and Johnson administrations and sustained by NASA ever since He finds a gang of cynics demagogues scheming politicians and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space Exposing the truth behind one of the most revered fictions of American history *Dark Side of the Moon* explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon The effort devoted to the space program was indeed magnificent and its cultural impact was profound but the purpose of the program was as desolate and dry as lunar dust

Bulletin of the Atomic Scientists , 1985-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world

The Space Race Matthew Brenden Wood, 2018-05-01 On July 20th 1969 Neil Armstrong landed gently on the lunar surface and became the first person to set foot on another world People around the world stopped what they were doing to crowd around television sets and radios to witness one of the greatest achievements in human history a man walking on the moon How did we get there Why haven t we gone back In *The Space Race* How the Cold War Put Humans on the Moon kids ages 12 to 15 explore the race to the moon against the chilling backdrop of the Cold War The Space Race was the period during and after the Cold War when America and the Soviet Union participated in a fierce competition to see which country could beat the other into space It was a time of bitterness fear and secrecy but it was also a moment in history when two countries directed resources toward pushing themselves to reach goals that were once thought unattainable Would we have succeeded as far as we did without the competition to be first While Neil Armstrong will be remembered as the first person to set foot on the moon the people and events behind this accomplishment populate a fascinating tale of politics science technology and teamwork that resulted in what might be the greatest accomplishment of the twentieth century In *The Space Race* middle

school students explore this history of science and discover the political social and economic factors that led to incredible achievements in space including the launch of Sputnik the launch of Explorer I and eventually the landing of Apollo 11 on the moon where Neil Armstrong took those famous first steps Middle school students will meet some of the tens of thousands of engineers and scientists that worked for years to create the technology needed to send humans to the moon and return them safely to Earth By showing space events against the backdrop of the turmoil back on Earth readers understand that scientific achievement doesn't happen in a vacuum even when it happens in space A wealth of links to primary sources makes this an interactive learning experience while science minded STEAM activities link the historical and scientific material Throughout the fun facts cool photos and investigative projects kids are encouraged to explore creative and critical thinking and problem solving strategies The Space Race is one book in a set of four that explore great events of the twentieth century Other titles in this set include Globalization Why We Care About Faraway Events The Vietnam War and World War II From the Rise of the Nazi Party to the Dropping of the Atomic Bomb

Transatlantic Space Politics Sheng-Chih Wang, 2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US European strategic interaction in space The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention As a theatre of interaction transatlantic space politics reflects the vicissitudes of European and US power in the international system An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order Using established IR theories the author investigates transatlantic space politics and proposes a theoretical explanation which is distinct from the conventional wisdom of the transatlantic security community More specifically he distinguishes between the constitutive and regulatory effects of the transatlantic security community an approach rarely employed in other research in the field Overall this book suggests not only that the transatlantic institutional pillar requires repair but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance This book will be of much interest to students of space power transatlantic politics strategic studies foreign policy and IR security studies in general
