Homosexuality and the Politics of Truth Jeffrey Satinover,1996-02 A Christian psychiatrist examines the latest research refuting the alleged genetic basis for homosexuality and assessing the social power homosexuals have gained **LGBTQ Politics** Marla Brettschneider,Susan Burgess,Christine Keating,2017-09-19 From Harvey Milk to Barney Frank and from ACT UP to Proposition 8 in the past few decades no political change has been more significant than the civil rights advancements of LGBTQ citizens LGBTQ Politics is

the first authoritative reader to approach the complexity of queer politics from a political science perspective bringing together original contributions from leading scholars in the field on key issues in LGBTQ politics These original essays cover a wide range of essential topics including marriage equality transgender discrimination gay and lesbian political candidates LGBTQ human rights advocacy HIV prevention and LGBTQ movements of the Global South The volume also includes a number of critical essays that reflect upon the state of political science as a discipline that has struggled to address queer politics Contributors draw from a variety of subfields in political science including comparative politics political theory

American politics public law and international relations Essays that focus on mainstream institutional politics appear alongside contributions grounded in grassroots movements and critical theory While some essays express concerns that the democratic basis of the LGBTQ movement has been undermined others celebrate the movement's successes and offer visions for the future A comprehensive thought provoking and authoritative collection LGBTQ Politics A Critical Reader is required reading for anyone looking to learn about the politics of sexuality Back cover *AIDS, Communication, and Empowerment* Roger Myrick, 2016-09-16 AIDS Communication and Empowerment examines the cultural construction of gay men in light of discourse used in the media's messages about HIV AIDS messages often represented as educational scientific and informational but which are in fact politically charged The book offers a compelling and substantive look at the social consequences of communication about HIV AIDS and the reasons for the successes and failures of contemporary health communication This analysis is important because it provides a reading of health communication from a marginal perspective one that has often been kept silent in mainstream academic research AIDS Communication and Empowerment offers a critical historical analysis of public health communication about HIV AIDS the ways this communication makes sense historically and culturally and the implications such messages have for the marginal group which has been most stigmatized as a consequence of these messages It covers such topics as the relationship among gay identity language and power cultural studies of the historical development of gay identity studies in health communication about HIV AIDS and health risk communication the political consequences of public health education about HIV AIDS on gay men the political consequences of media representations of gay identity and its relationship to disease Based primarily on the French scholar Michel Foucault's critical historical analysis of discourse and sexuality this book takes a timely and original approach which differs from traditional quantitative communication studies It examines the relationship between language and culture using a qualitative cultural studies approach which places medicalization theories in the broader context of histories of sexuality the discursive development of contemporary gay identity and recent public health communication Author Roger Myrick explains how mainstream communication about HIV AIDS relentlessly stigmatizes and further marginalizes gay identity He describes how national health education stigmatizes groups by associating them with images of disease and otherness Even communication which originates from marginal groups particularly those relying on federal funds often participates in linking gay identities with disease According to Myrick government funding while often necessary for the continuation of community based health campaigns poses obvious and direct restrictions on effective marginal education AIDS Communication and Empowerment allows for a rethinking of ways marginal groups can take control of their own education on public health issues As HIV AIDS cases continue to rise dramatically among marginalized and disenfranchised groups analysis of health communication directed toward them becomes crucial to their survival This book provides valuable insights and information for scholars professionals readers interested in the relationship among language power and marginal identity and for classes

in gay and lesbian studies health communication or political communication **Peculiar Faith** Jay Emerson
