Your Bedroom is an Ocean! Hannah Sheldon-Dean, 2021-06-08 Turn your home into an underwater utopia with Your Bedroom Is An Ocean a one of a kind craft book filled with everything a young seafarer needs to transform their space into an ethereal ecosystem Why look to the sky for mystery and wonder when one of history s greatest puzzles is right below our noses Earth s oceans remain one of the most mystifying entities in existence Swarming with species that have yet to be identified and housing unique characters like sailors pirates and according to some aliens the

planet's waters are one of the remaining frontiers of our modern world. So why wouldn't children want to immerse themselves in this mystical environment? *Your Bedroom Is An Ocean* gives them that power, making ocean exploration as easy as 1 2 turn the page please. And trust us, these pages are filled to the brim with facts and activities too irresistible to ignore. Like the largest ocean is the Pacific, which covers 30% of the Earth's surface. Tsunamis can thunder in at 500 miles per hour on a good day. The water emitting from hydrothermal vents deep beneath the surface can reach up to 750 degrees Fahrenheit. The planet's largest mountain range is not the Andes; it's the Mid-Oceanic ridge, and it's nearly ten times longer than it's above the surface counterpart, clocking in at a mind-boggling 40,390 miles. Have you heard of The Bloop? It's not a children's TV character; it's the largest ocean sound that has ever been recorded, and it happened in 1997. There are over 3 million shipwrecks peppering our ocean floors. 91 percent of sea creatures have yet to be discovered, which means marine biologists still have a lot of work to do. Want more? Don't worry. As the universe's largest inhabited space, the world's oceans have plenty of information to offer, all of which will be folded within the pages of our bubbly book. More than just a textbook, though, *Your Bedroom Is An Ocean* is also jam-packed with stunning photographs and textile add-ons like stickers that will help kids and parents alike submerge themselves into this perplexing underwater adventure.

[Ocean Animals \(Animal Planet Animal Bites\)](#) Animal Planet, Laaren Brown, 2016-04-01. [The Ocean of Life](#) Callum Roberts, 2012-05-24. A Silent Spring for oceans, written by the Rachel Carson of the fish world, *The New York Times*. Who can forget the sense of wonder with which they discovered the creatures of the deep? In this vibrant hymn to the sea, Callum Roberts, one of the world's foremost conservation biologists, leads readers on a fascinating tour of mankind's relationship to the sea, from the earliest traces of water on earth to the oceans as we know them today. In the process, Roberts

looks at how the taming of the oceans has shaped human civilization and affected marine life We have always been fish eaters from the dawn of civilization but in the last twenty years we have transformed the oceans beyond recognition Putting our exploitation of the seas into historical context Roberts offers a devastating account of the impact of modern fishing techniques pollution and climate change and reveals what it would take to steer the right course while there is still time Like *Four Fish* and *The Omnivore's Dilemma* *The Ocean of Life* takes a long view to tell a story in which each one of us has a role to play

The Magnificent Book of Sharks Barbara Taylor, Weldon Owen, 2022-06-07 From the tiny pygmy shark to the massive whale shark *The Magnificent Book of Sharks* depicts some of the ocean's most incredible creatures in stunning and accurate original illustrations Intriguing facts accompany every illustration

Abundant Earth Eileen Crist, 2019-01-17 In *Abundant Earth* Eileen Crist not only documents the rising tide of biodiversity loss but also lays out the drivers of this wholesale destruction and how we can push past them Looking beyond the familiar litany of causes a large and growing human population rising livestock numbers expanding economies and international trade and spreading infrastructures and incursions upon wildlands she asks the key question if we know human expansionism is to blame for this ecological crisis why are we not taking the needed steps to halt our expansionism Crist argues that to do so would require a two pronged approach Scaling down calls upon us to lower the global human population while working within a human rights framework to deindustrialize food production and to localize economies and contract global trade Pulling back calls upon us to free restore reconnect and rewild vast terrestrial and marine ecosystems However the pervasive worldview of human supremacy the conviction that humans are superior to all other life forms and entitled to use these life forms and their habitats normalizes and promotes humanity's ongoing expansion undermining our ability to enact these linked strategies and preempt the mounting suffering and dislocation of both humans and nonhumans *Abundant Earth* urges us to confront the reality that humanity will not advance by entrenching its domination over the biosphere On the contrary we will stagnate in the identity of nature colonizer and decline into conflict as we vie for natural resources Instead we must chart another course choosing to live in fellowship within the vibrant ecologies of our wild and domestic cohorts and enfolding human inhabitation within the rich expanse of a biodiverse living planet

The Wave Susan Casey, 2010-09-14 NEW YORK TIMES BESTSELLER In this wonderfully vivid kinetic narrative The New York Times the bestselling author of Voices in the Ocean captures colossal ship swallowing waves and the surfers and scientists who seek them out For legendary surfer Laird Hamilton hundred foot waves represent the ultimate challenge As Susan Casey travels the globe hunting these monsters of the ocean with Hamilton's crew she witnesses first hand the life or death stakes the glory and the mystery of impossibly mammoth waves Yet for the scientists who study them these waves represent something truly scary brewing in the planet's waters With inexorable verve The Wave brilliantly portrays human beings confronting nature at its most ferocious

In Pursuit of Giants Matt Rigney, 2017-04-04 For millennia the great fish marlin bluefin tuna and swordfish have reigned over the world's oceans and awed human beings Naturalists photographers sportfishermen and writers from Zane Grey to Ernest Hemingway have been inspired by their beauty power and sheer size But like much other marine life today these fish face perilous reductions in their populations due to destructive and illegal fishing inept fisheries management practices and dramatic changes in ocean ecology including those wrought by climate change In Pursuit of Giants is a moving elegy and a call to arms for the protection of these creatures as well as a five year 75 000 mile global adventure story that takes author Matt Rigney on a quest to discover how once thriving species are now threatened Rigney's pilgrimage to encounter these giants takes him from the sportfishing

mecca of Cabo San Lucas to the Great Barrier Reef from New Zealand to Nova Scotia Japan and the Mediterranean as he joins commercial and sport fishermen marine biologists fish farming pioneers and ocean activists to investigate the dangers these species face and the various efforts being made or not to protect them *Rowing the Atlantic* Roz Savage,2009-10-06

STUCK IN A corporate job rut and faced with an unraveling marriage at the age of thirty six Roz Savage sat down one night and wrote two versions of her own obituary the one that she wanted and the one she was heading for They were very different She realized that if she carried on as she was she wasn't going to end up with the life she wanted So she turned her back on an eleven year career as a management consultant to reinvent herself as a woman of adventure She invested her life's savings in an ocean rowboat and became the first solo woman ever to enter the Atlantic Rowing Race Her 3 000 mile trial by sea became the challenge of a lifetime Of the twenty six crews that set out from La Gomera six capsized or sank and didn't make it to the finish line in Antigua There were times when she thought she had hit her absolute limit but alone in the middle of the ocean she had no choice but to find the strength to carry on In *Rowing the Atlantic* we are brought on board when Savage's dreams of feasts are nourished by yet another freeze dried meal When her gloves wear through to her blistered hands When her headlamp is the only light on a pitch black night ocean that extends indefinitely in all directions When one by one all four of her oars break When her satellite communication fails Stroke by stroke Savage discovers there is so much more to life than a fancy sports car and a power suit job Flashing back to key moments from her life before rowing she describes the bolt from the blue that first inspired her to row across oceans and how this crazy idea evolved from a dream into a tendinitis inducing reality And finally Savage discovers in the rough waters of the Atlantic the kind of happiness we all hope to find

Exploring Ocean Life, Grades 1-2 Melissa Hart,2007-05 *Earth Spirit* Mark Hawthorne,2022-05-27 In *Eco Spirituality and Human Animal Relationships* Mark Hawthorne examines the all too often difficult and exploitative relationship between animals and humans Eco spirituality seeks to reassess our relationship with the environment where humans are understood as not morally superior but rather equal to the life forms with whom we share this planet Our kinship with animals has perhaps always been fragmented but it's not too late to embrace a new paradigm For us for them and for all life on Earth

To Have Borne Witness Barry Cogswell,2014-04-16 We are living in a time of massive change Our planet's life giving world of nature is suffering unsustainable duress and is headed towards collapse At the same time humankind is forging ahead with ever more potent and destructive industrial practices practices that are causing the over exploitation of both renewable and non renewable resources which in turn are resulting in even more worldwide environmental degradation As the power of industry becomes more efficient as the human population continues to increase and as life sustaining nature suffers ongoing trauma the situation will soon be dire Two overriding questions dominate On a finite planet can we really expect infinite growth and in our rush to grow the global economy are we condemning future generations to lives that will in fact be unsustainable If that is so as this book concludes it will inevitably cause civil conflict a conflict between the industrial

extractors of natural resources and those who wish to protect our earth for future generations Until now the conflicts have been mostly law abiding but for how long can more radical reactions be deterred Through reminiscences personal observations and documented examples of wild animal depletions the author explores the ecological damage we have already caused At the end of the book he proposes some solutions that should protect future generations from the outrages of our time But are we capable of making the necessary changes

Reflections of a Whale-watcher Michelle A. Gilders, 1995 A biologist describes her voyages and experiences through the Sea of Cortez and the Pacific Ocean in search of whales Sex, Drugs, and Sea Slime Ellen Prager, 2024-05-31 When viewed from a quiet beach the ocean with its rolling waves and vast expanse can seem calm even serene But hidden beneath the sea's waves are a staggering abundance and variety of active creatures engaged in the never ending struggles of life to reproduce to eat and to avoid being eaten With Sex Drugs and Sea Slime marine scientist Ellen Prager takes us deep into the sea to introduce an astonishing cast of fascinating and bizarre creatures that make the salty depths their home From the tiny but voracious arrow worms whose rapacious ways may lead to death by overeating to the lobsters that battle rivals or seduce mates with their urine to the sea's masters of disguise the octopuses Prager not only brings to life the ocean's strange creatures but also reveals the ways they interact as predators prey or potential mates And while these animals make for some jaw dropping stories witness the sea cucumber which ejects its own intestines to confuse predators or the hagfish that ties itself into a knot to keep from suffocating in its own slime there's far more to Prager's account than her ever entertaining anecdotes again and again she illustrates the crucial connections between life in the ocean and humankind in everything from our food supply to our economy and in drug discovery biomedical research and popular culture Written with a diver's love of the ocean a novelist's skill at storytelling and a scientist's deep knowledge Sex Drugs and Sea Slime enchants as it educates enthralling us with the wealth of life in the sea and reminding us of the need to protect it
