## **Outsourcing IT The Legal Aspects:**

*Outsourcing IT* Rachel Burnett, 1998 Information technology is one of the most common management functions to be outsourced. Aimed at both the IT supplier and customer, this book offers a guide to the legal aspects of outsourcing information technology.

**Outsourcing IT - The Legal Aspects** Rachel Burnett, 2016-05-13 Outsourcing has increased and developed immensely in scope, sophistication and ambition over the last twenty years and continues to evolve. Information technology outsourcing is potentially highly complex and risk laden, especially for the fast-growing areas of business process and transformational outsourcing, and where whole departments or business areas are outsourced. Decisions taken by the customer at the outset have long-term ramifications; they need to ensure that the processes are flexible enough to deal with change, maintain necessary levels of security, avoid abandoning management of key resources, and prevent costs spiralling out of control. It is essential to have a good contract to meet such challenges. All these issues and others such as intellectual property arrangements, the complexities of transferring staff, property and other assets, tendering procedures, and performance monitoring must not be ignored and are addressed in the second edition of Rachel Burnett's successful *Outsourcing IT*. Whether you are a supplier or a customer, it is vital to have a properly negotiated formal contract if you are entering into an outsourcing arrangement. A good contract needs careful planning, and this book provides a comprehensive guide to the whole process. Well-planned and well-structured outsourcing arrangements by well-informed and well-advised customers are far more likely to work for both customer and supplier alike.

The Public International Law of Trade in Legal Services David Collins, 2018-11-08 This book examines the international legal regime covering trade in legal services. While legal services are a vital component of the economies of many developed and emerging countries, they remain poorly liberalized with numerous restrictions undermining market access for foreign suppliers. Although some modern bilateral and regional trade agreements have begun to address barriers to trade in legal services, few go beyond the basic commitments of non-discrimination and transparency contained in the WTO GATS. This book approaches the pressing need to open the global market for trade in legal services across the four modes of supply: cross-border consumption abroad, commercial presence and temporary movement of natural persons. It considers changes under way within the legal profession brought about by alternative business structures and technology. Both underscore the importance of reconceptualizing trade in legal services as one that should be as open as possible with a view to maximizing competition while safeguarding the needs of clients.
