## **Outsourcing War The Just War Tradition In The Age Of Military Privatization:**

**Outsourcing War** Amy E. Eckert, 2016-02-19 Recent decades have seen an increasing reliance on private military contractors PMCs to provide logistical services training maintenance and combat troops In *Outsourcing War* Amy E Eckert examines the ethical implications involved in the widespread use of PMCs and in particular questions whether they can fit within customary ways of understanding the ethical prosecution of warfare Her concern is with the *ius in bello* right conduct in war strand of just war theory Just war theorizing is generally built on the assumption that states and states alone wield a monopoly on the legitimate use of force Who holds responsibility for the actions of PMCs What ethical standards might they be required to observe How might deviations from such standards be punished The privatization of warfare poses significant challenges because of its reliance on a statist view of the world Eckert argues that the tradition of just war theory which predates the international system of states can evolve to apply to this changing world order With an eye toward the practical problems of military command Eckert delves into particular cases where PMCs have played an active role in armed conflict and derives from those cases the modifications necessary to apply just principles to new agents in the landscape of war

**Ending War** Chiara De Franco, Anders Engberg-Pedersen, Martin Mennecke, 2021-11-29 *Ending War A Dialogue across Disciplines* examines how wars end from a multidisciplinary perspective and includes enquiries into the politics of war the laws of war and the military and intellectual history of war In recent years the changes in the character of contemporary warfare have created uncertainties across different disciplines about how to identify and conceptualise the end of war A whole constellation of questions arises from such uncertainties How do philosophers define ethical responsibilities in bello and post bellum if the boundary between war and peace is ever so blurred How do strategists define their objectives if the teleology of action becomes uncertain How do historians bracket the known endings of war and delve into the arguments that preceded them Which answers can international law provide for the ending of wars and which challenges remain or have recently arisen This volume addresses these questions and enables both an understanding of how the end as a concept informs the understanding of war in international relations in international law and in history as well as a reconsideration of the nature of scientific method in the field of war studies as such The chapters in this book were originally published as a special issue of *The Journal of Strategic Studies*

**The New Dogs of War** Ward Thomas, 2021-09-15 As Ward Thomas details in *The New Dogs of War* militias and paramilitary groups wield greater power than national governments in many countries while in some war zones private contractors perform missions previously reserved for uniformed troops Most ominously terrorist organizations with global reach have come to define the security landscape for even the most powerful nations Across the first decades of the twenty first century we have witnessed a dramatic rise in the use of military force by these nonstate actors in ways that have impacted the international system leading Thomas to undertake this valuable assessment of the state of play at this critical moment To understand the spread of nonstate violence Thomas focuses on the crucial role

played by an epochal transformation in international norms Since the eighteenth century the Westphalian model of sovereignty has reserved the legitimate use of force to states Thomas argues that normative changes in the decades after World War II produced a crisis of coherence for formal and informal rules against nonstate violence In detailed case studies of nonstate militias transnational terrorist networks and private military contractors Thomas explains how forces contesting state prerogatives exploited this crisis which in turn reshaped international understandings of who could legitimately use force By considering for the first time all three purveyors of nonstate violence as aspects of the same phenomenon The New Dogs of War explains this fundamental shift in the norm that for centuries gave states the monopoly on military force

**Moral Responsibility in Twenty-First-Century Warfare** Steven C. Roach, Amy E. Eckert, 2020-09-01 2021 CHOICE Outstanding Academic Title Moral Responsibility in Twenty First Century Warfare explores the complex relationship between just war theory and the ethics of autonomous weapons systems AWS One of the challenges facing ethicists of war particularly just war theorists is that AWS is an applicative concept that seems in many ways to lie beyond the humanist scope of the just war theory tradition The book examines the various ethical gaps between just war theory and the legal and moral status of AWS addresses the limits of both traditional and revisionist just war theory and proposes ways of bridging some of these gaps It adopts a dualistic notion of moral responsibility or differing related notions of moral responsibility and legitimate authority to study the conflicts and contradictions of legitimizing the autonomous weapons that are designed to secure peace and neutralize the effects of violence Focusing on the changing conditions and dynamics of accountability responsibility autonomy and rights in twenty first century warfare the volume sheds light on the effects of violence and the future ethics of modern warfare

**The Ethics of War and Peace Revisited** Daniel R. Brunstetter, Jean-Vincent Holeindre, 2018-01-10 How do we frame decisions to use or abstain from military force Who should do the killing Do we need new paradigms to guide the use of force And what does victory mean in contemporary conflict In many ways these are timeless questions But they should be revisited in light of changing circumstances in the twenty first century The post Cold War post 9 11 world is one of contested and fragmented sovereignty contested because the norm of territorial integrity has shed some of its absolute nature fragmented because some states do not control all of their territory and cannot defeat violent groups operating within their borders Humanitarian intervention preventive war and just war are all framing mechanisms aimed at convincing domestic and international audiences to go to war or not as well as to decide who is justified in legally and ethically killing The international group of scholars assembled in this book critically examine these frameworks to ask if they are flawed and if so how they can be improved Finally the volume contemplates what all the killing and dying is for if victory ultimately proves elusive

**Applied Afro-Communitarian Ethics and Foreign Armed Intervention** Danny Singh, 2024-10-10 Just war theory concerns the morality of engaging in warfare the conduct in war and justice including democratization and reconstruction in the aftermath to end war The morality of war can be measured from a variety of

military and philosophical ethics that include theological consequentialist and realist schools of thought Various military interventions such as Bosnia Afghanistan and Iraq have been analyzed and evaluated and criticized from a Western and especially liberal point of view In this book Danny Singh addresses foreign interventions from a different normative paradigm Namely he addresses the morality of foreign military interventions in light of Afro communitarianism a dominant philosophical approach in sub Saharan Africa According to Afro communitarianism positive communal relationships social harmony are the greatest good that can be achieved to form friendship which can be understood as the combination of shared identity and goodwill Even though Afro communitarianism prioritizes peaceful communal relations enmity behavior and violence are morally permissible if it either leads to a less disharmonious state of affairs or to a harmonious state of affairs or there are no friendly alternatives to achieve any of both desired outcomes but the initiator of conflict desires to promote them Moreover Afro communitarianism prescribes dialogue as a guiding action to avoid military conflict The book provides an alternative and non Western approach to the morality of war and efforts to promote sustainable peace in the aftermath of conflict between warring belligerent parties

**The Oversight of Outsourcing US Intelligence After 9/11** Bülent Sungur, 2025-04-25 This book is a story about Private Intelligence Contractors PICs and their relationship with the United States executive and legislative principals in the War on Terror when the line between the public and private sectors has been increasingly blurred PICs have challenged the traditional approach which assumes that sensitive intelligence tasks should be performed by government officials because of their importance for national security So this book examines the principal agent relationship and the oversight problem between PICs the US Intelligence Community IC the president and Congress after the 9 11 attacks The

book demonstrates that by exploiting information asymmetry adversely selected PICs can violate legislative rules and goals such as by performing inherently governmental tasks colluding with the IC capturing the control of the task and contractual process abuse waste and fraud In addition to get around congressional oversight and achieve his or her hidden agenda the executive principal can also mismanage contractors through the IC or delegate contractors to perform inherently governmental tasks

*The Business of War* James McCarty, Matthew Tapie, Justin Bronson Barringer, 2020-10-01 The Business of War incisively interrogates the development and contemporary implications of the military industrial complex It exposes the moral dangers of life in neoliberal economies dependent upon war making for their growth and brings the Christian tradition's abundance of resources into conversation with this phenomenon In doing so the authors invite us to rethink the moral possibilities of Christian life in the present day with an eye toward faithful resistance to the business of war and its influence in every aspect of our lives In combining biblical historical theological and ethical analyses of the business of war the authors invite us to better understand it as a new moral problem that demands a new faithful response With contributions from Pamela Brubaker Stan Goff Christina McRorie Kara Slade Won Chul Shin David Swartz Jonathan Tran Myles Werntz Matthew Whelan Tobias Winright

*The War In-Between* Wendy Kozol, 2024-05-07 Explores the ambiguities and contradictions that disrupt the assumed boundaries of battle zones Against the fabric of suffering that unfolds around more spectacular injuries and deaths The War In Between studies visual depictions of banal routine or inscrutable aspects of militarized violence Spaces of the in between are both broader and much less visible than battlefields even though struggles for survival arise out of the same conditions of structural violence Visual artifacts including photographs video data visualizations fabric art and craft projects provide different vantage points on the quotidian impacts of militarism whether it is the banality of everyday violence for non combatants or the daily struggles of soldiers living with physical and emotional trauma Three interrelated concepts frame the book's attempt to stay in the moment of looking at visual cultures of survival First the concept of the war in between captures those interstitial spaces of war where violence and survival persist side by side Second this book expands the concept of indexicality to consider how images of the in between rely on a range of indexical traces to produce alternative visualities about survival and endurance Third the book introduces an asymptotic analysis to explore the value in getting close to the diverse experiences that comprise the war in between even if the horizon line of experience is always just out of reach Exploring the capaciousness of survival reveals that there is more to feel and engage in war images than just mangled bodies collapsing buildings and industrialized death The War In Between Kozol argues offers not a better truth about war but an accounting of visualities that arise at the otherwise unthinkable junction of conflict and survival

*Gender and Civilian Victimization in War* Jessica L. Peet, Laura Sjoberg, 2019-11-25 This book explores the role of gender in influencing war fighting actors strategies toward the attack or protection of civilians Traditional narratives suggest that killing civilians intentionally in wars happens infrequently and that the perpetration of

civilian targeting is limited to aberrant actors Recently scholars have shown that both state and non state actors target civilians even while explicitly deferring to the civilian immunity principle This book fills a gap in the accounts of how civilian targeting happens and shows that these actors are in large part targeting women rather than some gender neutral understanding of civilians It presents a history of civilian victimization in wars and conflicts and then lays out a feminist theoretical approach to understanding civilian victimization It explores the British Blockade of Germany in World War I the Soviet Rape of Berlin in World War II the Rwandan genocide and the contemporary conflict in northeast Nigeria Across these case studies the authors lay out that gender is key to how war fighting actors understand both themselves and their opponents and therefore plays a role in shaping strategic and tactical choices It makes the argument that seeing women in nationalist and war narratives is crucial to understanding when and how civilians come to be targeted in wars and how that targeting can be reduced This book will be of much interest to students of critical security gender studies war studies and International Relations in general
