Metodologia Delle Scienze Sociali Marradi:

Handbook of Research on Advanced Research Methodologies for a Digital Society Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever changing challenge for social scientists This challenge is harder than ever today as current societies are changing quickly and in many sometimes conflicting directions Social phenomena personal interactions and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline reality These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know interpret and analyze the world Internet and computer mediated communication CMC is being incorporated into every aspect of daily life and social life has been deeply penetrated by the internet This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web 2 0 which widened the opportunities for user generated content the emergence of an internet of things and of ubiquitous mobile devices that make it possible to always be connected This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting suitable adaptable and pertinent to the society to be studied The chapters are geared towards unlocking the future frontiers and potential for social research in the digital society They include theoretical epistemological and ontological reflections about the digital research methods as well as innovative methods and tools to collect analyze and interpret data This book is ideal for social scientists practitioners librarians researchers academicians and students interested in social research methodology and its developments in the digital scenario

The Digital Shift and the Social Research: Methods and Practices Paolo

Diana, 2025-07-29 The Digital Shift and the Social Research Methods and Practices offers a comprehensive exploration of how the digital era particularly in the wake of the COVID 19 pandemic has transformed the field of social research Drawing on both theoretical discussions and empirical studies the book provides an in depth analysis of the impact of digital tools on research methods behaviour and interactions while addressing the ethical challenges that arise in online contexts The first part of the book examines the expansion of traditional research methods through digital platforms with a focus on how these innovations shape social norms and practices The second part shifts attention to education presenting strategies to improve student engagement and foster collaborative learning in the virtual classroom The third part highlights groundbreaking case studies from the University of Salerno illustrating innovative pedagogical approaches in teaching social research methodology By integrating insights from across the fields of digital research pedagogy and ethics this work challenges researchers and educators alike to rethink conventional approaches and adapt to the rapidly changing digital environment Ideal for students educators and professionals it serves as both a reference and a practical guide for navigating the evolving landscape of social research Original and timely this book will appeal to academics practitioners and researchers in social sciences providing not only theoretical perspectives but also hands on solutions for digital research and learning environments

Knowledge in the Development of Economies Silvia Sacchetti, Roger Sugden, 2011-01-01 This book presents an entirely new approach to knowledge creativity and social organisation The first part of the book provides a trenchant critique of current globalisation of multinational corporations the WTO and intellectual property rights The rest of the book outlines an alternative globalisation based on inclusion democratic participation and equality The role of the universities in this process is given special attention The alternative globalisation is still based on the market economy but not necessarily one in which the sole objective of the corporations is to maximise profits The book is a must read for all economists including those who are satisfied with the current state of the subject The analyses of this volume of outstanding papers edited by Sacchetti and Sugden are fresh sober and entirely convincing Ajit Singh University of Cambridge UK It is

arguable that at the root of the current global crisis lies the ferocious attack on critical thinking indeed freedom of thought that has taken place over the past 30 years or so The editors of this volume are among the minority voices that kept thinking outside the box and voicing their views during this period Their present volume offers fascinating readings on diverse issues ranging from uneven development through university and art management to motivation capabilities and democratic governance as they relate to knowledge and learning It is hoped that the book will receive the attention it deserves and that more such voices will now be raised and heard Christos Pitelis University of Cambridge UK While the relevance of knowledge in economic development represents a consolidated result this volume takes some important steps forward in new directions Highly valuable is the attempt to integrate the study of knowledge production with its potential for improved creativity whose expression is now dependent on the social structure and is not merely exogenous any more The focus on heterodox approaches and on non traditional organisational and proprietary forms is particularly coherent with both the theoretical premises of the volume and the expected evolution of economies Carlo Borzaga University of Trento Italy This is a collection of essays which escapes the confines of mainstream economics raising fundamental questions of the role of academics in policy making It requires the reader to imagine different worlds to think beyond present realities a book striving to deal with important issues not sliding over them to make cheap points A scholarly work demanding in places difficult but worth persevering with Should be read by everyone interested in a different way forward for economic development in a global world Keith Cowling University of Warwick UK This innovative book offers a critical perspective on the state of the current global economy making sense of knowledge related issues by critically assessing existing institutional choices as well as pointing to new ways forward The pioneering chapters reposition knowledge in a number of economic debates including regional development property rights social enterprises corporate governance the management of universities and the role of creative activities They explore the possibility of an institutional dynamism that impacts not only on the characteristics of localities and their place in a hierarchical and ordered system of relationships but on the nature of the system itself Conclusions point at the individual and collective dimensions of the knowledge discovery process suggesting a renewed approach to the assessment of economic choices This insightful book offers an original perspective on knowledge related issues and constitutes a valuable read for academics and postgraduate students in international business and economic competitiveness as well practitioners and policymakers who are interested in alternative analyses and methods for economic develop
