Michel Foucault Lynn Fendler, 2010 **Michel Foucault** Lynn Fendler, 2014-10-23 Michel Foucault's influential work spanned a wide array of intellectual disciplines his writings having been widely taken up in philosophy history literary criticism and political theory Focusing on the implications of Foucault's theories for education whilst characterizing them as provocative problematizing poetic and playful Lynn Fendler describes the historical context for understanding Foucault's ground breaking critiques Including a discussion of his major theories of disciplinary power genealogy discourse and subjectivity this text provides generative explanations of concepts using analogies to the Internet and to food in order to connect Foucault's theories to everyday experience *Educational Research: Material Culture and Its Representation* Paul Smeyers, Marc Depaepe, 2014-02-10 This collection discusses and illustrates how educational research is affected by the economic institutional and physical contingencies of its time and in our time even increasingly is driven by them It is argued that the antidote to this is however not to aspire to thought itself but instead to do justice to its own rootedness in the material including textuality From an historical point of view such an innovative approach can itself revamp the material scholarly culture and the way it is represented The chapters address a variety of topics such as the cultural heritage of the school desk the significance of images for research into long term educational processes the way iconic signs function and how modes of enquiry relate to the materiality of education Attention is also given to standards for reporting on educational research studies and how these limit the scope and communication and moreover shape researchers to the forms of citation practices as substantially influencing methods and content and to the centrality of conversation not just as the means to an end but as what matters further to representational and to non representational theories for educational research Some examples are drawn from the area of arts based educational research from mathematics education and from the discourse on universities **The Philosophy of Education: An Introduction** Richard Bailey, 2014-10-28 The Philosophy of Education An Introduction encourages the reader to actively engage with the philosophy of education and the carefully selected contributors bring the philosophy of education to life for the reader Each chapter focuses on a particular area of debate and explains the main concepts includes extracts from philosophical writing followed by questions that guide the reader to critically and actively engage with the text guides the reader towards further reading and suggests next steps and more challenging sources or counter pointed arguments The Philosophy of Education An Introduction is essential reading for education students and for trainee teachers on undergraduate and postgraduate programmes It will also appeal to practicing teachers and educationalists who wish to engage with philosophical approaches to contemporary educational issues E. G. West James Tooley, 2014-10-23 What role should government have in education This question has exercised philosophers since Plato and economists since Adam Smith It is also a question that is as relevant today as people around the world worry about standards in public government schools and governments and international agencies look to fine tune their educational

policies This book describes and analyses the work of one economist Professor E G West whose life s work was focused precisely on this question His classic 1965 book Education and the State and subsequent writings inspired a new way of looking at this question Based on historical analysis of what happened in the UK and USA before governments got involved in education and supplemented with philosophical exploration of the justifications for government involvement West set out a position with only minimal state involvement James Tooley outlines West s ideas and their challenges elaborating them in terms of public choice theory and recent empirical evidence of education without the state in developing countries **Loris**
