Disgorgement of Profits Ewoud Hondius,André Janssen,2015-08-12 Disgorgement of profits is not exactly a household word in private law Particularly in civil law jurisdictions as opposed to those of the common law the notion is not well known What does it stand for It is best illustrated by examples One of the best known being the British case of *Blake v Attorney General* 2001 1 AC 268

In which a double spy had been imprisoned by the UK government before escaping and settling in the former Soviet Union While there wrote a book on his experiences upon which the UK government claimed the proceeds of the book The House of Lords as it then was allowed the claim on the basis of Blake s breach of his employment contract Other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense In such cases the question arises whether the infringing party should be disgorged of his profits This volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law It does not purport to answer the question whether or not such damages should or should not be awarded It does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions *Technologies and Eco-innovation towards Sustainability I* Allen H. Hu,Mitsutaka Matsumoto,Tsai Chi Kuo,Shana Smith,2019-01-04 This 2 volume book covers the state of the art of the research and practices on eco design It covers the latest topics in the field e g global eco design management big data in eco design social perspectives in eco design as well as emphasizing the developments in emerging economies such as Asian countries Eco design of products and product related services are indispensable to realize the circular economy and to increase resource efficiencies of our society Eco design practices are necessary both in developed countries and developing countries The book chapters are contributed by the worldwide authors especially authors from East Asian countries European countries and Southeast Asian countries and contains selected presentations at the EcoDesign2017 symposium 10th International Symposium on Environmentally Conscious Design and Inverse Manufacturing The first volume highlights products and services the chapters include the product life cycle design and business strategy technologies for the future and sustainability as well as social perspectives in eco design
