Maghnie, 2015-12-10 Dealing with current hot topics this book aims to provide an update on advances in the treatment of endocrine disorders The chapters cover innovative therapeutic

approaches to type 1 diabetes such as artificial pancreas and islet transplantation. Additionally, novel pharmacological interventions for patients with obesity and the metabolic syndrome as well as with adrenal and gonadal disorders are provided. Furthermore, recent developments in growth promoting therapies such as the C type natriuretic peptide analog to treat achondroplasia as well as antioxidant and gene replacement therapies in patients with adrenoleukodystrophy are described. Worldwide renowned experts share their experience and cutting edge research in *Advanced Therapies in Pediatric Endocrinology and Diabetology* which makes it a useful and interesting resource for every pediatric endocrinologist not only those active in clinical research but also those involved in the management of children with endocrine diseases in daily practice.

*Yearbook of Pediatric Endocrinology 2013* K. Ong, Z. Hochberg, 2013-09-05. The body of knowledge in most medical specialties is rapidly expanding making it virtually impossible to follow all advances in clinical and basic sciences that are relevant to a given field. This is particularly true in pediatric endocrinology at the cross road of pediatrics, endocrinology, development and genetics. Providing abstracts of articles that report the year's breakthrough developments in the basic sciences and evidence based new knowledge in clinical research and clinical practice that are relevant to the field, the *Yearbook of Pediatric Endocrinology 2013* keeps busy clinicians and scientists, pediatric endocrinologists and also pediatricians and endocrinologists informed on new advances. Twelve Associate Editors and their co-authors selected from several thousand papers those that brought the most meaningful new information, summarized them and provided comments to put them into perspective. The papers are classified into those that identify new genes involved in diseases, new hormones, concepts revised or re-centered, important observations for clinical practice, large scale clinical trials, new mechanisms, new paradigms, important review articles, new fears and new hopes. Because the *Yearbook* is endorsed by the European Society for Paediatric Endocrinology (ESPE), its publication is linked to the annual meeting of the ESPE. The *Yearbook of Pediatric Endocrinology 2013* covers the medical and scientific literature from June 2012 through May 2013.
