New York 1880 Robert A.M. Stern, Thomas Mellins, David Fishman, 1999-04-01 This is the fourth volume in architect and historian Robert A M Stern's monumental series of documentary studies of New York City architecture and urbanism The three previous books in the series New York 1900 New York 1930 and New York 1960 have comprehensively covered the architects and urban planners who defined New York over the course of the twentieth century In this volume Stern turns back to 1880 the end of the Civil War the beginning of European modernism to trace the earlier history of the city This dynamic era saw the technological advances and acts of civic and private will that formed the identity of New York City as we know it today The installation of water telephone and electricity infrastructures as well as the advent of electric lighting the elevator and mass transit allowed the city to grow both out and up The office building and apartment house types were envisioned and defined changing the ways that New Yorkers worked and lived Such massive public projects as the Brooklyn Bridge and Central Park became realities along with such private efforts as Grand Central Station Like the other three volumes New York 1880 is an in depth presentation of the buildings and plans that transformed New York from a harbor town into a world class metropolis A broad range of primary sources critics and writers architects planners city officials brings the time period to life and allows the city to tell its own complex story The book is generously illustrated with over 1 200 archival photographs which show the city as it was and as some parts of it still are **New York: Art and Cultural**

despite numerous setbacks and challenges Construction did not begin until 1898 and when completed in 1954 the cathedral became New Jersey's largest church and the most expensive Catholic church ever built in America During Pope John Paul II's visit to the United States in 1995 he celebrated evening prayer at the Cathedral On that occasion the Cathedral of the Sacred Heart was elevated to a basilica to become the Cathedral Basilica of the Sacred Heart Meticulously researched Gothic Pride brings to life the people who built contributed to and worshipped in Sacred Heart recalling such remarkable personalities as George Hobart Doane Jeremiah O'Rourke Gonippo Raggi and Archbishop Thomas Walsh In many ways the cathedral's story is a lens that lets us look at the history of Newark itself its rise as an industrial city and its urban culture in the nineteenth century its transformation in the twentieth century its immigrants and the profound effects of their cultures especially their religion on American life and the power of architecture to serve as a symbol of community values and pride **Biography**

or city hall as a place of local governance is historically related to the founding of cities in medieval Europe As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry In subsequent centuries as the idea and built form travelled beyond Europe to become an established institution across the globe the parameters of civic representation changed and the town hall was forced to negotiate new notions of urbanism and public space City Halls and Civic Materialism Towards a Global History of Urban Public Space utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space The essays in this volume provide an analysis of the architecture iconography and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts in Europe Asia Australia Africa and the Americas as the relation between citizens and civic authority had to be revisited with the universal franchise under fascism after the devastation of the world wars decolonization and most recently with the neo liberal restructuring of cities As a global phenomenon the town hall challenges the idea that nationalism imperialism democracy the idea of citizenship concepts that frame the relation between the individual and the body politic travel the globe in modular forms or in predictable trajectories from the West to East North to South Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society then the town hall as a global spatial type architectural space urban monument and space of governance holds a mirror to the promise and limits of civil society **Exploring Gramercy Park and Union**
