Death Work Vincent E. Henry,2004-04-01 In this fascinating new book Vincent Henry a 21 year veteran of the NYPD who recently retired to become a university professor explores the psychological transformations and adaptations that result from police officers encounters with death Police can encounter death frequently in the course of their duties and these encounters may range from casual contacts with the deaths of others to the most profound and personally consequential confrontations with their own mortality Using the survivor psychology model as its theoretical base this insightful and provocative research ventures into a previously unexplored area of police psychology to illuminate and explore the new modes of adaptation thought and feeling that result from various types of death encounters in police work The psychology of survival asserts that the psychological world of the survivor one who has come in close physical or psychic contact with death but nevertheless managed to live is characterized by five themes psychic numbing death guilt the death imprint suspicion of counterfeit nurturance and the struggle to make meaning These themes become manifest in the survivor s behavior permeating his or her lifestyle and worldview Drawing on extensive interviews with police officers in five nominal categories rookie officers patrol sergeants crime scene technicians homicide detectives and officers who survived a mortal combat situation in which an assailant or another officer died Henry identifies the impact such death encounters have upon the individual the police organization and the occupational culture of policing He has produced a comprehensive and highly textured interpretation of police psychology and police behavior bolstered by the unique insights that come from his personal experience as an officer his intimate familiarity with the subtleties and nuances of the police culture s value and belief systems and his meticulous research and rigorous method Death Work provides a unique prism through which to view the individual organizational and social dynamics of contemporary urban policing With a foreword by Robert Jay Lifton and a chapter devoted to the local police response to the World Trade Center attacks Death Work will be of interest to psychologists and criminal justice experts as well as police officers eager to gain insight into their unique relationship to death

Misdemeanorland Issa Kohler-Hausmann,2018-04-03 An in depth look at the consequences of New York City s dramatically expanded policing of low level offenses Felony conviction and mass incarceration attract considerable media attention these days yet the most common criminal justice encounters are for misdemeanors not felonies and the most common outcome is not prison In the early 1990s New York City launched an initiative under the banner of Broken Windows policing to dramatically expand enforcement against low level offenses Misdemeanorland is the first book to document the fates of the hundreds of thousands of people hauled into lower criminal courts as part of this policing experiment Drawing on three years of fieldwork inside and outside of the courtroom in depth interviews and analysis of trends in arrests and dispositions of misdemeanors going back three decades Issa Kohler Hausmann argues that lower courts have largely abandoned the adjudicative model of criminal law administration in which questions of factual guilt and legal punishment drive case outcomes Due to the sheer volume of arrests lower courts have adopted a managerial model and the implications are troubling Kohler Hausmann shows how significant volumes of people are marked tested and subjected to surveillance and control even though about half the cases result in some form of legal dismissal She describes in harrowing detail how the reach of America s penal state extends well beyond the shocking numbers of people incarcerated in prisons or stigmatized by a felony conviction Revealing and innovative Misdemeanorland

shows how the lower reaches of our criminal justice system operate as a form of social control and surveillance often without adjudicating cases or imposing formal punishment The Crime Numbers Game John A. Eterno,Eli B. Silverman,2017-07-27
In the mid 1990s the NYPD created a performance management strategy known as Compstat It consisted of computerized data crime analysis and advanced crime mapping coupled with middle management accountability and crime strategy meetings with high ranking decision makers While initially credited with a dramatic reduction in crime questions quic
