Condit, 1999-01-01 The invention of the New York skyscraper is one of the most fascinating developments in the history of architecture This authoritative book chronicles the history of New York's first skyscrapers challenging conventional wisdom that it was in Chicago and not New York that the skyscraper was born 206 illustrations *The American Skyscraper*,

1850-1940 Joseph J. Korom, 2008 The skyscraper is an American invention that has captured the public's imagination for over a century. The tall building is wholly manmade and borne in the minds of those with both slide rules and computers. This is the story of the skyscraper's rise and the recognition of those individuals who contributed to its development. This volume is unique: its approach, information, and images are fresh and telling. The text examines America's first tall buildings, the result of twelve years of in-depth research by an accomplished and published architect and architectural historian. Over 300 compelling photographs, charts, and notes make this the ultimate tool of reference for this subject. Biographies woven throughout with period norms, politics, and lifestyles help to place featured skyscrapers in context. Quite simply, there is no book like this. The text, carefully and insightfully written, is clear, concise, and easily digestible, the text being the product of well-documented original research written in an informative tone. *The American Skyscraper 1850-1940: A Celebration of Height* is a richly documented journey of a fascinating topic and it promises to be a superb addition to libraries, schools of architecture, students of architecture, and lovers of art.

Postcard America Jeffrey L. Meikle, 2016-01-20 From the Great Depression through the early postwar years, any postcard sent in America was more than likely a linen card. Colorized in vivid, often exaggerated hues and printed on card stock embossed with a linen-like texture, linen postcards celebrated the American scene with views of majestic landscapes, modern cityscapes, roadside attractions, and other notable features. These colorful images portrayed the United States as shimmering with promise, quite unlike the black and white worlds of documentary photography or *Life* magazine. Linen postcards were enormously popular, with close to a billion printed and sold. *Postcard America* offers the first comprehensive study of these cards and their cultural significance. Drawing on the production files of Curt Teich Co. of Chicago, the originator of linen postcards, Jeffrey L. Meikle reveals how photographic views were transformed into colorized postcard images, often by means of manipulation, adding and deleting details or collaging bits and pieces from several photos. He presents two extensive portfolios of postcards: landscapes and cityscapes that comprise a representative iconography of linen postcard views. For each image, Meikle explains the postcard's subject, describes aspects of its production, and places it in social and cultural contexts. In the concluding chapter, he shifts from historical interpretation to a contemporary viewpoint, considering nostalgia as a motive for collectors and others who are fascinated today by these striking images.

Seeing Ghosts Karen Engle,2009-04-01 On September 11 more people clicked on documentary news photographs than on pornography for the first and only time in the history of the Internet reports writer David Levi Strauss The archive of images associated with the tragic events of 9 11 merits careful analysis Artist Damien Hirst has suggested that the attacks were designed to be viewed The thing about 9 11 is that it s kind of an artwork in its own right It was wicked but it was devised in this way for this kind of

impact It was devised visually Starting from the tremendous fascination with images of 9 11 Karen Engle asks what in the context of a national trauma makes an image appropriate or scandalous exploring how diverse visual media have been mobilized in political projects of identification and personal narratives of empathy Focusing on themes of memory mourning and history Engle examines sculptural photographic and new media responses to the 9 11 attacks in both contemporary and historical contexts considers the public s reaction to these visual productions and suggests that earlier presentations of America at war play a pivotal role in the representations of 9 11 in both official and popular media Seeing Ghosts is a groundbreaking theoretical study of how we remember how we mourn and how images of a particular event influence our imagination of the future

The Skyscraper and the City Don LePan,2025-09-18 *The Skyscraper and the City* brings together thirty years of the artist s watercolor images of cities LePan s work goes against the tradition of presenting skyscrapers with a hard and precise verticality the lines of these towers blur and bleed into each other into the sky and the natural world and often into the human life of the city In their sense of movement these watercolor images of bridges and baseball stadiums as well as of skyscrapers at times recall the work of John Marin while in their viewpoint they may bring to mind the bird s eye view city paintings of Oskar Kokoschka or John Hartman LePan s paintings have been exhibited only once in a solo show in Brooklyn in

2008 Commenting on that exhibition Hartman whose sweeping canvasses have been acclaimed world wide described these watercolor works as very good and together they form a coherent and focused body of work The Skyscraper and the City includes images from as far afield as Cape Town London and Sydney but the primary focus is on the North American city Calgary Chicago Los Angeles New Orleans New York and Vancouver are each the subject of numerous paintings in all over fifty cities are represented Substantial captions accompanying many of the images discuss the circumstances in which the work was painted various aesthetic issues and the architectural history of the buildings depicted An appendix includes examples of the artist s preliminary sketches and photographs In a brief introduction LePan discusses the history of skyscraper art the nature of watercolor as a medium and his own background as a watercolor painter
