Resources in Education ,2001-10 **Teacher Induction Policy in Global Contexts** Jian Wang, 2024-07-01 Teacher induction is becoming increasingly important focus of education policy developed to help beginning teachers develop professionally and stay in teaching work force as a way to meet the needs of global economy and social transformation for teaching quality and student learning in many countries Policy borrowing is a common practice in teacher induction across different countries Such a policy borrowing allow policymakers in particular countries to access different options and choices in their policy development instead of trial and error However it is often done without a careful policy analysis as its base especially the analysis that focuses on the problems the borrowed policy intends to solve social political and educational contexts in which it develops explicit and implicit conceptual assumptions underlying it its implementation and associated challenges and its intended and unintended impacts Without such an analysis as its base the implementations of policy

borrowed from other countries can cause unnecessary financial human resource and emotional costs in its context even if the policy proves to be successful in the other place. This book serves for such needs of policy analysis in the field of teacher induction. It starts with the book editor's overview of the book and its intention. Then there are 16 chapters, each is written by a distinguished scholar or a policy analyst from a particular country that analyzes the focuses, contexts, assumptions, implementation challenges, and consequences of a specific teacher induction policy developed in their home country and then raise important research questions emerging from their analysis. The book is expected to attract readers including scholars, policy makers, practitioners, and graduate students in different countries who have interests in teacher induction research policy and practice. **The Wiley Handbook of Action Research in Education** Craig A.
