Nexus Ramez Naam, 2012-12-18 Book 1 of the Nexus Trilogy Continued in Book 2 Crux In the near future the experimental nano drug Nexus can link humans together mind to mind There are some who want to improve it There are some who want to eradicate it And there are others who just want to exploit it When a young scientist is caught improving Nexus he is thrust over his head into a world of danger and international espionage for there is far more at stake than anyone realizes From the halls of academe to the halls of power from the headquarters of an elite US agency in Washington DC to a secret lab beneath a top university in Shanghai from the underground parties of San Francisco to the illegal biotech markets of Bangkok from an international neuroscience conference to a remote monastery in the mountains of Thailand Nexus is a thrill ride through a future on the brink of explosion Shortlisted for the Arthur C Clarke Award Shortlisted for the Prometheus Award Shortlisted for the Kitschies Award An NPR Best Book of 2013 Good Scary good Wired Provocative A double edged vision of the post human The Wall Street Journal A lightning bolt of a novel with a sense of awe missing from a lot of current fiction Ars Technica Starred Review Naam turns in a stellar performance in his debut SF novel What matters here is the remarkable scope and narrative power of the story Booklist A superbly plotted high tension technothriller full of delicious thoughtful moral ambiguity a hell of a read Cory Doctorow A gripping piece of near future speculation all the grit and pace of the Bourne films Alastair Reynolds author of Revelation Space A sharp chilling look at our likely future Charles Stross author of Singularity Sky and Halting State The most brilliant hard SF thriller I've read in years Reminds me of Michael Crichton at his best Brenda Cooper author of The Creative Fire A rich cast of characters the action scenes are crisp the glimpses of future tech and culture are mesmerizing Publishers Weekly Any old writer can take you on a roller coaster ride but it takes a wizard like Ramez Naam to take you on the same ride while he builds the roller coaster a few feet in front of you John Barnes author of Directive 51 Michael Crichton like SFX Magazine An incredibly imaginative action packed intellectual romp Dani Kollin Prometheus Award winning author of The Unincorporated Man The only serious successor to Michael Crichton Scott Harrison author of Archangel **Growth and Development** Robert E. Ulanowicz, 2012-12-06 What in the ever loving blue eyed world do these Ulanowicz's innocuous comments on thermodynamics have to do with ecology Anonymous manuscript reviewer The American Naturalist 1979 The germ of the idea grows very slowly into something recognizable It may all start with the mere desire to have an idea in the first place Walt Kelly Ten Ever Lovin Blue Eyed Years with Pogo 1959 It all seems extremely interesting but for the life of me it sounds as if you pulled it out of the air my good friend Ray Lassiter exclaimed to me after enduring about 20 minutes of my enthusiasm for the newly formulated concept of ascendancy in ecosystems It wasn't I replied but it would take a book to show you where it came from If such was the reaction of someone usually sympathetic to my manner of thinking what could I expect from those who viewed biological development in the traditional way After all I was suggesting that it is possible to quantify the growth and development of

an entire ecosystem Furthermore I was maintaining that this development was not entirely determined by events and entities at smaller scales and yet could influence these component processes and structures To be sure mine was only the latest of many challenges to straight reductionism but like everyone else with a new idea I thought mine was special

**Flows of Energy and Materials in Marine Ecosystems** M. J. R. Fasham, 2013-03-09 The impetus for the conference held at Bombannes France in May 1982 arose out of a Scientific Committee on Oceanic Research SCOR Working Group on Mathematical Models in Biological Oceanography This group was chaired by K H Mann and held two meetings in 1977 and 1979 At both meetings it was felt that although reductionist modelling of marine ecosystems had achieved some successes the future progress lay in the development of holistic ecosystem models The members of the group K H Mann T Platt J M Colebrook D F Smith M J R Fasham J Field G Radach R E Ulanowicz and F Wulff produced a critical review of reductionist and holistic models which was published by the Unesco Press Platt Mann and Ulanowicz 1981 One of the conclusions of this review was that whether holistic or reductionist models are preferred it is critically important to increase the scientific effort in the measurement of physiological rates for the computation of ecological fluxes The Working Group therefore recommended that an international meeting should be organized which would attempt to bring together theoretical ecologists and biological oceanographers to assess the present and future capability for measuring ecological fluxes and incorporating these data into models An approach was made to the Marine Sciences Panel of the NATO Science Committee who expressed an interest in funding such a meeting They awarded a planning grant and a planning group was formed consisting of M J R Fasham M V Angel T Platt R E

*Reason in Nature* Matthew Boyle, Evgenia Mylonaki, 2022-12-06 A group of distinguished philosophers reflect on John McDowell's arguments for nonreductive naturalism an approach that can explain what is special about human reason without implying that it is in any sense

supernatural John McDowell is one of the English speaking world's most influential living philosophers whose work has shaped debates in mind language metaphysics epistemology meta ethics and the history of philosophy A common thread running through McDowell's diverse contributions has been his critique of a form of reductive naturalism according to which human minds must be governed by laws essentially similar to those that govern the rest of nature Against this widely accepted view McDowell maintains that human minds should be seen as transformed by reason in such a way that the principles governing our minds while not supernatural are in an important sense sui generis Editors Matthew Boyle and Evgenia Mylonaki assemble a group of distinguished philosophers to clarify and criticize McDowell's core position and explore its repercussions for contemporary debates about metaphysics and epistemology perception language action and value The essays here scrutinize the core idea that human reason constitutes a second nature emerging from humanity's basic animal nature and reflect on the underpinnings of McDowell's claims in Aristotle Kant and Hegel Many of the contributors extend McDowell's views beyond his own articulations elaborating the transformative role that reason plays in human experience In clarifying and expanding McDowell's insights Reason in Nature challenges contemporary orthodoxy much as McDowell himself has And as this collection makes clear McDowell's unorthodox position is of enduring importance and has wide ranging implications still not fully appreciated for ongoing philosophical debates Dynamics, Games and Science II Mauricio Matos Peixoto, Alberto Adrego Pinto, David A. Rand, 2011-05-27

Dynamics Games and Science I and II are a selection of surveys and research articles written by leading researchers in mathematics The majority of the contributions are on dynamical systems and game theory focusing either on fundamental and theoretical developments or on applications to modeling in biology economics engineering finances and psychology The papers are based on talks given at the International Conference DYNA 2008 held in honor of Mauricio Peixoto and David Rand at the University of Braga Portugal on September 8-12 2008 The aim of these volumes is to present cutting edge research in these areas to encourage graduate students and researchers in mathematics and other fields to develop them further **Mathematical Ecology** Simon A.
