*Reference and Information Sources*

*and Services for Children and Young Adults* Lesley S.J. Farmer, 2022-09-01 Reference and information services are more important than ever for today's young people. By analyzing key features of reference and information services to young people in school and public library environments including the research behind the trends and issues, librarians can make sure that those services are appropriately responsive to children and teens. Based on standards and evidence-based practice, this book helps you to optimize those resources and services by providing guidance in assessing youth communities, determining youth's information needs and information behaviors, developing and maintaining age-appropriate reference collections, starting with the book's core list of print and online resources, optimizing physical and virtual access to reference and information sources, interacting with youth and facilitating their reference and information literacy skills, curating and producing reference and information products, dealing with relevant legal and ethical issues, and planning effective library reference and information services for youth. Chapter sidebar examples provide food for thought. *Cases on Research Support Services in Academic Libraries* Fernández-Marcial, Viviana, González-Solar, Llarina, 2020-08-28 Academic libraries have traditionally had two key functions: to support teaching and to support research. In an evolving and competitive university environment along with the emergence of various technologies and substantial changes in scientific communication, university management has reached a turning point. Academic libraries are facing a paradigm shift in the role they need to play to achieve the research objectives of universities. Research support services in academic libraries have evolved as a response to these changes. They are heterogeneous, adapt to their university culture, adopt different points of view, take different approaches in their organizational structures, and include a diverse catalog of activities. Having an overview of different experiences will allow libraries to adopt best practices, redefine services, and even establish new management and collaboration models. *Cases on Research Support Services in Academic Libraries* is a critical scholarly resource that uses case studies to systematize the experiences of research support services in academic libraries for the support of higher education faculty. The cases focus on such items as the role of technology and its impact, as well as how these services help to improve the excellence of universities. Featuring a wide range of topics such as library services, data management, and open science, this book is ideal for librarians, academicians, professionals, researchers, and students. *Open Access and the Future of Scholarly Communication* Kevin L. Smith, Katherine A. Dickson, 2016-12-08 This volume, the second of two in the series *Creating the 21st Century Academic Library*, that deals with the topic of open access in academic libraries, focuses on the implementation of open access in academic libraries. Chapters on the legalities and practicalities of open access in academic libraries address the issues associated with copyright licensing and intellectual property and include support for courses that require open access distribution of student work. The topic of library services in support of open access is explored, including the library's role in providing open educational resources and as an ally and driver of their adoption, for example, by helping defray author fees that are required for open access articles. A detailed look at open access

in the context of undergraduate research is provided and considers how librarians can engage undergraduates in conversations about open access. Chapters consider ways to engage undergraduate students in the use, understanding, evaluation, and creation of open access resources. Issues that are of concern to graduate students are also given some attention, and central to these are the development of Electronic Thesis and Dissertation (ETD) programs. A chapter examines the library's role in balancing greater access to graduate student work with the consequences of openness, such as concerns about book contracts and sales, plagiarism, and changes in scholarly research and production. The book concludes with issues surrounding open data and library services in critical data librarianship, including advocacy, preservation, and instruction. It is hoped that this volume and the series in general will be a valuable and exciting addition to the discussions and planning surrounding the future directions, services, and careers in the 21st-century academic library.
