Quality Management Mary Pellettieri, 2015-10-07 Quality management for small regional and national breweries is critical for the success of craft brewing businesses Written for staff who manage quality assurance QA and quality control QC in breweries of all sizes this book clearly sets out how quality management is integrated into every level of operation Author Mary Pellettieri shows how quality management is a concept that encompasses not only the free from defect ethos but combines the wants of the consumer and the art of brewing good beer Breweries must foster a culture of quality where governance and management seamlessly merge policy strategy specifications goals and implementation to execute a QA QC program What tests are necessary knowing that food safety alone does not signify a quality product adhering to good management practice GMP proper care and maintenance of assets standard operating procedures training and investment in staff and more must be considered together if a quality culture is to translate into success The people working at a brewery are the heart of any quality program Management must communicate clearly the need for quality management delineate roles and responsibilities and properly train and assess staff members Specialist resources such as a brewery laboratory are necessary if an owner wants to be serious about developing standard methods of analysis to maintain true to brand specifications and ensure problems are identified before product quality suffers Staff must know the importance of taking corrective action and have the confidence to make the decision and implement it in a timely fashion With so many processes and moving parts a structured problem solving program is a key part of any brewery s quality program How should you structure your brewing lab so it can grow with your business What chemical and microbiological tests are appropriate and effective How are new brands incorporated into production How do you build a sensory panel that stays alert to potential drifts in brand quality Which FDA and TTB regulations affect your brewery in terms of traceability and GMP Can you conduct and pass an audit of your processes and products Mary Pellettieri provides answers to these key organizational logistical and regulatory considerations

Craft Brewery HACCP Neal R. Baughman, 2014 The brewing industry has historically had little food safety regulation In response to the September 11th attacks new legislation culminating in the Food Safety Modernization Act of 2010 was established and reinforced food safety regulations for the brewing industry Under this expanded regulation breweries are required to comply with the modernized Current Good Manufacturing Practices cGMPs The regulatory climate for the brewing industry is very complicated The brewing industry is regulated primarily under the jurisdiction of the Alcohol and Tobacco Tax and Trade Bureau and the Food and Drug Administration Based upon the regulatory environment and business considerations Boulevard Brewing Company has opted to develop a Hazard Analysis and Critical Control Point HACCP plan Before a HACCP plan can be implemented a foundation of prerequisite programs based on the FDA s cGMPs must be in place Prerequisite programs establish the operational and environmental conditions required for a successful HACCP plan Failure to comply with the cGMPs can lead to fines re inspection fees forced recalls

and possible criminal prosecution Prerequisite programs were developed for the following areas facilities including sanitary design principles utilities traffic and product flow production equipment including preventive maintenance and calibration receiving warehousing and shipping including supplier control chemical control and raw material testing pest control for insects rodents and birds cleaning and sanitation under a Master Sanitation Schedule specifications including ingredients products and packaging materials personal hygiene for both employees and visitors and lastly a system of traceability and recall These prerequisite programs based on cGMPs are required to ensure regulatory compliance while minimizing regulatory and fiscal risks
