Jeffrey Snyder, Carlo Fanciulli, 2021-06-15 The field of thermoelectricity has continued to develop rapidly in recent years and remains one of the most exciting areas of research for a materials physicist The need for sustainable energy has added a technological momentum to the challenge of devising materials with exceptional properties such as low thermal conductivity high electrical conductivity and a large Seebeck coefficient and has triggered a global interdisciplinary effort More recently research on thermoelectric materials has promoted and motivated a major research endeavor to clarify the factors affecting thermal conductivity in nanostructures as part of a more general effort to apply nanotechnology to enhance the performance of thermoelectric materials for use in thermoelectric generators and coolers This book contains the lectures presented as Course 207 of the International School of Physics Enrico Fermi Advances in Thermoelectricity Foundational Issues Materials and Nanotechnology held in Varenna Italy

from 15 20 July 2019 This comprehensive course aimed to provide students with a modern vision of the physics of thermoelectric phenomena starting from the thermodynamics of thermoelectricity and from the physics of transport processes and demonstrating how material structure and nanostructure together with defects have been used to tailor the physical properties of advanced thermoelectrics Special attention was also given to areas of current research from spin caloritronics to charge transport in polymers and to a selected number of applications for heat recovery Encompassing the full complexity of modern thermoelectricity and covering the most cogent themes relevant to current research the book will be of interest to all those working in the field *Phenomenological Pedagogy* Nicoletta Ghigi,Valeria Bizzari,Moir

Sannipoli,2025-07-02 This volume covers the application of phenomenology not only to psychology and psychiatry but precisely to pedagogy and the training of educators It fills a gap in offering a unique resource which combines both theory and practice Through an interdisciplinary means this book provides new theories and applications of phenomenological pedagogy at all levels of education and with a unique focus on autism and special educational needs It proposes a shift in the paradigm and treatment from a neuro cognitivist approach at the present core of most pedagogical theories to a phenomenological and enactivist perspective on subjectivity It appeals to students researchers and practitioners working in phenomenology psychology and education *Forward-looking External Search as a Driver for Innovation* Sara

Polier,2019-04-25 In this empirical analysis Sara Polier investigates forward looking external search strategies and their impact on the value contribution of corporate foresight Based on a mixed method approach combining a quantitative and qualitative analysis of large R D intensive firms the findings reveal a general positive influence of different search strategies with respect to the scope i e breadth depth and distance and direction of search i e market science and intermediary driven on the role of foresight as a driver for innovation This relationship is found to be mediated by a firm s exploratory learning capability which appears to facilitate the effective transfer of external future related knowledge into valuable outputs

The IFPUG Guide to IT and Software Measurement IFPUG,2012-04-25 The widespread deployment of millions of current and emerging software applications has placed software economic studies among the most critical of any form of business analysis Unfortunately a lack of an integrated suite of metrics makes software economic analysis extremely difficult The International Function Point Users Group IFPUG a nonpro *Critical ELT Practices in Asia* Kiwan Sung,Rod

Pederson,2012-09-13 This is the first and long awaited work on critical approaches to teaching English for the purposes of democracy and social justice that challenges the current views of ELT such as English being merely a tool for communication or the acquisition of basic skills or high test scores for advancement in education and the marketplace A timely work and a fresh look at critical approaches to ELT in Asia An invaluable work that simultaneously problematizes current ELT practices while introducing new possibilities for critical practices in localized contexts in Asia An important work that shines a light on how the forces of globalization not only dictate the spread of English as an international language but how these forces also

dictate what is taught and how An informative view on how ELT practices are being re envisioned by critical educators in Asia This groundbreaking volume compiling critical perspectives of English language teaching in China Hong Kong Indonesia Korea and Sri Lanka confronts colonial legacies observed in educational practices and policies that perpetuate a divide between the privileged and the underprivileged The critical reflections scrutinize the nature of English as a commodified gatekeeper and simultaneously provide alternative visions for language education Ryuko Kubota Professor The university of British Columbia New Science of Learning Myint Swe Khine,Issa M. Saleh,2010-06-16 The earliest educational software simply transferred print material from the page to the monitor Since then the Internet and other digital media have brought students an ever expanding low cost knowledge base and the opportunity to interact with minds around the globe while running the risk of shortening their attention spans isolating them from interpersonal contact and subjecting them to information overload The New Science of Learning Cognition Computers and Collaboration in Education deftly explores the multiple relationships found among these critical elements in students increasingly complex and multi paced educational experience Starting with instructors insights into the cognitive effects of digital media a diverse range of viewpoints with little consensus this cutting edge resource acknowledges the double edged potential inherent in computer based education and its role in shaping students thinking capabilities Accordingly the emphasis is on strategies that maximize the strengths and compensate for the negative aspects of digital learning including Group cognition as a foundation for learning Metacognitive control of learning and remembering Higher education course development using open education resources Designing a technology oriented teacher professional development model Supporting student collaboration with digital video tools Teaching and learning through social annotation practices The New Science of Learning Cognition Computers and Collaboration in Education brings emerging challenges and innovative ideas into sharp focus for researchers in educational psychology instructional design education technologies and the learning sciences *An Introduction to Fish Migration* Pedro Morais,Francoise Daverat,2016-04-21 Since the publication of The Migrations of Fish by Prof Alexander Meek in 1916 a number of books have been published on this subject However most of these books only cover one type of migratory mechanisms This book aims to overcome this drawback by presenting a comprehensive coverage of all life history strategies potadromy anadromy catadrom
