New Tools For Environmental Protection Education Information And Voluntary Measures:

New Tools for Environmental Protection National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-06-13 Many people believe that environmental regulation has passed a point of diminishing returns the quick fixes have been achieved and the main sources of pollution are shifting from large point sources to more diffuse sources that are more difficult and expensive to regulate The political climate has also changed in the United States since the 1970s in ways that provide impetus to seek alternatives to regulation This book examines the potential of some of these new tools that emphasize education information and voluntary measures Contributors summarize what we know about the effectiveness of these tools both individually and in combination with regulatory and economic policy instruments They also extract practical lessons from this knowledge and consider what is needed to make these tools more effective The book will be of interest to environmental policy practitioners and to researchers and students concerned with applying social and behavioral sciences knowledge to improve environmental quality *Environmental Health Perspectives*, 2004 The New Environmental Regulation Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki, Michael Kraft, 2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it

has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world s leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

A Southern Region Conference on Technology Transfer and Extension Sarah F.

Ashton, William Gary Hubbard, Harold M. Rauscher, 2009 Managing the Environment, Managing Ourselves Richard N. L. Andrews, 2006-09-18 In this book Richard N L Andrews looks at American environmental policy over the past four hundred years shows how it affects environmental issues and public policy decisions today and poses the central policy challenges for the future This second edition brings the book up to date through President George W Bush s first term and gives the current state of American environmental politics and policy A guide to what every organizational decision maker public and private needs to know in an era in which environmental issues have become global Lynton K Caldwell Public Administration Review A wonderful text for students and scholars of environmental history and environmental policy William L Andreen

Environmental History **Green Growth and Travelism** Terry DeLacy, Min Jiang, Geoffrey Lipman, Shaun Vorster, 2014-05-09 The green growth paradigm emerged from evolving global strategies that coherently promote a more socially inclusive low carbon resource efficient stable economy with decreasing poverty Opportunities and challenges associated with the paradigm shift are expected to transform the travel and tourism travelism sector in all respects and on a global scale This involves the transformation of the entire travelism value chain as well as the communities in tourism destinations However there is a lack of systematic reports on wide ranging and complex implications of the green growth paradigm for the travelism sector This book focuses on the twin pillars green growth and travelism as key building blocks in exploring an essential multi decade lifestyle change for planetary and human well being through the lenses of concept policy and practice It provides a conceptual discussion of the implications of the new development trend for key players in the

travelism system offers case studies from both developed and developing countries that highlight key issues in the transformation towards the green economy and explores the policy settings and frameworks on both the global and national levels that underpin travelism green growth This book offers tourism industry players academics students policy makers and practitioners a comprehensive discussion of the latest progress in green growth and travelism

Why Good People Do Bad Environmental Things Elizabeth R. DeSombre, 2018 Why do people behave in ways that cause environmental harm Despite not wanting to create environmental problems we all do so regularly in the course of living our everyday lives This book looks at how social structures incentives information habits attitudes norms and the inherent characteristics of environmental resources explain and influence how we behave and how those causes influence what we can do to change behavior

Decision Making for the Environment National Research Council, Division of Behavioral and Social Sciences and Education, Center for Economic, Governance, and International Studies, Committee on the Human Dimensions of Global Change, Panel on Social and Behavioral Science Research Priorities for Environmental Decision Making, 2005-05-31 With the growing number complexity and importance of environmental problems come demands to include a full range of intellectual disciplines and scholarly traditions to help define and eventually manage such problems more effectively Decision Making for the Environment Social and Behavioral Science Research Priorities is the result of a 2 year effort by 12 social and behavioral scientists scholars and practitioners The report sets research priorities for the social and behavioral sciences as they relate to several different kinds of environmental problems

Making Profits, Protecting Our Planet, 2005 This book i identifies a range of market and social forces driving the private sector toward more responsible environmental stewardship ii shows the need for governments the private sector and communities to adjust their relations iii and argues for enhanced enforcement of environmental regulations by governments even as they reach out to the private sector for stronger collaboration in environmental protection

Environment Jules Pretty, 2006-06-23 This four volume set explores the locations where the environment matters most such as where people are poor where environments are under threat such as on frontiers where there are few natural resources remaining and where industrialization is rampant It will also explore these concerns at different system levels from local community to regional national and global It will also explore costs of damage to the very resources on which economies rely and the values of environmental goods and services and the controversies surrounding such valuations It is organized around environment people interactions livelihoods poverty income economic growth environment environment interactions do people matter and people people interactions collective action challenges institutions

Battleground: Environment Robin Morris Collin, 2008-07-30 The environment inflames passions in people on all points of the political spectrum Controversies over such issues as the rise of cancer in industrialized countries climate change and urban sprawl have skyrocketed as we recognize the impact that humans have on the environment Many people become immersed in these controversies at a local level before they know much about the topic the nuances of many

environmental conflicts are often overlooked as the media focuses on the adversarial nature of the conflict This reference resource provides students teachers librarians and citizens as a whole with the necessary first step in understanding these hot button issues Each entry identifies the issue involved who was holding various points of view or positions where and when the conflict occurred and explains the cultural social and political context and dimensions of the conflict Battleground Environment provides in depth analysis of over 100 of the most controversial topics involving the environment including childhood asthma the Kyoto Summit and Treaty smart growth the Three Gorges Dam in China and genetically modified food Entries include descriptions of public policies and discussions of the future of the controversy Each entry concludes with cross references and a short relevant bibliography suitable for student research The resource includes numerous sidebars that discuss in detail particular local controversies that illuminate the complexity of the topics discussed Free-Choice Learning and the Environment John H. Falk, Joe E. Heimlich, Susan Foutz, 2009-05-16 Free Choice Learning and the Environment explores the theoretical practical and policy aspects of free choice environmental education for learners of all ages *Environmental Policy and Household Behaviour* Patrik Soderholm, 2013-07-04 Our behaviour in our own homes our recycling habits consumer choices and transport preferences all have a huge impact on the environment locally and globally Governments across the world are trying to formulate and implement policies to encourage and enforce more sustainable household actions Yet so often these policies fail to have the desired effects because of a lack of understanding of the complex interplay of policy and individual behaviour This book examines this interplay looking at the role of values attitudes and constraints in the links between policy and changing behaviour at the household level The first part of the book explores the theoretical background looking at the politics of lifestyles and lifestyle change policy legitimacy and barriers and facilitators for pro environmental behaviour The second part is made up of in depth case studies from Sweden one of the fore running countries in this area examining three main types of household behaviour waste and recycling consumption and labelling and transportation choices Within these case studies the contributors examine what policy initiatives have and haven't worked and the role of values and constraints in those processes This is the first inter disciplinary in depth look at how environmental policy enters the private domestic sphere The theoretical insights and policy guidance the book offers will be vital in the drive to generate behaviour change at the household level and the move towards sustainable societies

Chemicals Without Harm Ken Geiser, 2015-05-29 Thousands of synthetic chemicals are used to make our clothing cosmetics household products and electronic devices However many of these chemicals are hazardous and potentially dangerous to our health and the environment For fifty years the conventional approach to hazardous chemicals has focused on regulation barriers and control Today there is a growing international interest in going beyond a singular focus on toxic and hazardous chemicals and

developing broader policies for managing all chemicals This book proposes a new strategy for chemical management based on changing chemical production and consumption systems *Disaster Research and the Second Environmental Crisis*
James Kendra, Scott G. Knowles, Tricia Wachtendorf, 2019-04-04 The 50th anniversary of the Disaster Research Center of the University of Delaware provoked a discussion of the field's background, its accomplishments, and its future directions. Participants representing many disciplines brought new methods to bear on perennial problems relevant to effective disaster management and policy formation. However, new concerns were raised stemming from the fact that we live today in a globally unfolding environmental crisis every bit as pressing and worrisome as that of the 1960s when the Disaster Research center was founded. This volume brings together ideas of participants from that workshop as well as other contributors. Topics include the history and evolution of disaster research, innovations in disaster management, disaster policy, and ethical considerations of disaster research. Readers interested in science and technology, public policy, community action, and the evolution of the social sciences will find much of interest in this collection.
