Sinless in Sin City David T. Fiske, 2011-09-22. Do you have a demon that you cannot get rid of? Has God tried to get your attention? God finally got my attention and showed me the way, the truth and the life that set me free. Free from an addiction that was destroying me and my family and my friendships. I had gambled compulsively for ten years. I was in deep debt and no one knew it except God. Then my family began to figure out that I had a problem. God used my family to get my attention. God wanted me to change. Once I admitted to myself that I had a gambling problem, God sent me to the desert of Las Vegas to beat it. I went on a four day trip with my mom and tried to not bet. Once I met Jesus over and over during my journey. During my pilgrimage, I had extraordinary experiences and interesting interactions. In the end, God helped me beat gambling on its own turf, Sin City. I grew so much because of this journey. God wanted me to share it with you.

Playing against Nature Seth Stein, Jerome Stein, 2014-04-09 Defending society against natural hazards is a high stakes game of chance against nature involving tough decisions How should a developing nation allocate its budget between building schools for towns without ones or making existing schools earthquake resistant Does it make more sense to build levees to protect against floods or to prevent development in the areas at risk Would more lives be saved by making hospitals earthquake resistant or using the funds for patient care What should scientists tell the public when as occurred in L'Aquila Italy and Mammoth Lakes California there is a real but small risk of an upcoming earthquake or volcanic eruption Recent hurricanes earthquakes and tsunamis show that society often handles such choices poorly Sometimes nature surprises us when an earthquake hurricane or flood is bigger or

has greater effects than expected from detailed hazard assessments In other cases nature outsmarts us doing great damage despite expensive mitigation measures or causing us to divert limited resources to mitigate hazards that are overestimated Much of the problem comes from the fact that formulating effective natural hazard policy involves combining science economics and risk analysis to analyze a problem and explore the costs and benefits of different options in situations where the future is very uncertain Because mitigation policies are typically chosen without such analysis the results are often disappointing This book uses general principles and case studies to explore how we can do better by taking an integrated view of natural hazards issues rather than treating the relevant geoscience engineering economics and policy formulation separately Thought provoking questions at the end of each chapter invite readers to confront the complex issues involved Readership Instructors researchers practitioners and students interested in geoscience engineering economics or policy issues relevant to natural hazards Suitable for upper level undergraduate or graduate courses Additional resources can be found at <http://www.wiley.com/go/SteinPlayingagainstnature>
