gods. It emerged from our animal

or at least with our ape siblings. I was
sure of that. I was talking with Nimbo."*

Displaying Death and Animating Life Jane C. Desmond, 2016-08-18 The number of ways in which humans interact with animals is almost incalculable From beloved household pets to the steak on our dinner tables the fur in our closets to the Babar books on our shelves taxidermy exhibits to local zoos humans have complex deep and dependent relationships with the animals in our ecosystems In Displaying Death and Animating Life Jane C Desmond puts those human animal relationships under a multidisciplinary lens focusing on the less obvious and revealing the individualities and subjectivities of the real animals in our everyday lives Desmond a pioneer in the field of animal studies builds the book on a number of case studies She conducts research on site at major museums taxidermy conventions pet cemeteries and even at a professional conference for writers of obituaries She goes behind the scenes at zoos wildlife clinics and meetings of pet cemetery professionals We journey with her as she meets Kanzi the bonobo artist and a host of other animal artists all of whom are preparing their artwork for auction Throughout Desmond moves from a consideration of the visual display of unindividuated animals to mourning for known animals and finally to the marketing of artwork by individual animals The first book in the new Animal Lives series Displaying Death and Animating Life is a landmark study bridging disciplines and reaching across divisions from the humanities and social sciences to chart new territories of investigation **Reading Victorian Deafness**

Jennifer Esmail, 2013-04-15 Reading Victorian Deafness is the first book to address the crucial role that deaf people and their unique language of signs played in Victorian culture Drawing on a range of works from fiction by Charles Dickens and Wilkie Collins to poetry by deaf poets and life writing by deaf memoirists Harriet Martineau and John Kitto to scientific treatises by Alexander Graham Bell and Francis Galton Reading Victorian Deafness argues that deaf people s language use was a public influential and contentious issue in Victorian Britain The Victorians understood signed languages in multiple and often contradictory ways they were objects of fascination and revulsion were of scientific import and literary interest and were considered both a unique mode of human communication and a vestige of a bestial heritage Over the course of the nineteenth century deaf people were increasingly stripped of their linguistic and cultural rights by a widespread pedagogical and cultural movement known as oralism comprising mainly hearing educators physicians and parents Engaging with a group of human beings who used signs instead of speech challenged the Victorian understanding of humans as the speaking

animal and the widespread understanding of language as a product of the voice It is here that Reading Victorian Deafness offers substantial contributions to the fields of Victorian studies and disability studies This book expands current scholarly conversations around orality textuality and sound while demonstrating how understandings of disability contributed to Victorian constructions of normalcy Reading Victorian Deafness argues that deaf people were used as material test subjects for the Victorian process of understanding human language and by extension the definition of the human *Evolution of an Unorthodox Rabbi* John Moscovitz, 2015-10-31 A most unorthodox rabbi revisits twenty five turbulent years in Toronto's Reform Jewish community John Moscovitz is an unlikely rabbi who rejected a religious life as a teenager and spent his formative years as a social activist under the wing of a radical professor It is hard to say what path his life might have taken had not a spiritual awakening led him to devote his life to the service of the Jewish community This set him on a path to becoming one of Toronto's most cherished and effective rabbis over the past twenty five years For the congregants of Holy Blossom Temple Toronto's oldest Reform synagogue those twenty five years were a great blessing In the sermons he has gathered here Rabbi Moscovitz looks back at the temple and congregation he served for so long A most unconventional rabbi indeed he charts the rapid shifts in thinking on issues including same sex marriage peace between Israelis and Palestinians and gun control laws Part memoir part social history this book is also a deep examination of a long personal and public journey into the centre of an evolving community of faith **Language Myths, Mysteries and Magic** K.

Watanabe, Stan Kuczaj, 2012-08-31 This book takes a multidisciplinary approach to emotion with contributions from biologists psychologists neuroscientists robot engineers and artists A wide range of emotional phenomena is discussed including the notion that humans' sophisticated sensibility as evidenced by our aesthetic appreciation of the arts is based at least in part on a basic emotional sensibility that is found in young children and perhaps even some non human animal species As a result this book comprises a unique comparative perspective on the study of emotion A number of chapters consider emotions in a variety of animal groups including fish birds and mammals Other chapters expand the scope of the book to humans and robots Specific topics covered in these chapters run the gamut from lower level emotional activity such as emotional expression to higher level emotional activity such as altruism love and aesthetics Taken as a whole the book presents manifold perspectives on emotion and provides a solid foundation for future multidisciplinary research on the nature of emotions **The Bible and Posthumanism** Jennifer L. The Quest for Symbolic Communication in Non-Human Animals Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e g great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2 3 symbols can be trained to be understood by several species e g great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species

The Origins of Self Martin P. J. Edwardes, 2019-07-22 The Origins of Self explores the role that selfhood plays in defining human society and each human individual in that society It considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood Edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do The self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people Edwardes proposes that human construction of selfhood involves seven different types of self All but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness We rely on others to tell us about our self and even to let us know we are a self
