Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29. Why the world's most resilient dictatorships are products of violent revolution. *Revolution and Dictatorship* explores why dictatorships born of social revolution, such as those in China, Cuba, Iran, the Soviet Union, and Vietnam, are extraordinarily durable even in the face of economic crisis, large-scale policy failure, mass discontent, and intense external pressure. Few other modern autocracies have survived in the face of such extreme challenges. Drawing on comparative historical analysis, Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict, which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism. Although most revolutionary governments begin weak, they challenge powerful domestic and foreign actors, often bringing about civil or external wars. These counterrevolutionary wars pose a threat that can destroy new regimes, as in the cases of Afghanistan and Cambodia. Among regimes that survive, however, prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus. This leads to the downfall of rival organizations and alternative centers of power, such as armies, churches, monarchies, and landowners, and helps to inoculate revolutionary regimes against elite defection, military coups, and mass protest, three principal sources of authoritarian breakdown. Looking at a range of revolutionary and nonrevolutionary regimes from across the globe, *Revolution and Dictatorship* shows why governments that emerge from violent conflict endure.

Enduring Socialism Harry G. West, Parvathi Raman, 2009. Against the historical backdrop of successive socialist and post-socialist claims to have completely remade society, the contributors to this volume explore the complex and often paradoxical continuities between diverse post-socialist presents and their corresponding socialist and pre-socialist pasts. The chapters focus on ways in which pre-socialist economic, political, and cultural forms, in fact, endured an era of socialism and have found new life in the post-socialist present. Notwithstanding revolutionary socialist claims, continuities with a pre-socialist past have been produced within the historical imaginary of post-socialism, and socialist economic, political, and cultural forms have, in fact, endured in a purportedly post-socialist era despite the claims of neo-liberal reformers. Publisher's website. Every Day We Live Is the Future Douglas Haynes, 2017-10-11. When she was only nine, Dayani Baldelomar left her Nicaraguan village with nothing more than a change of clothes. She was among tens of thousands of rural migrants to Managua in the 1980s and 1990s. After years of homelessness, Dayani landed in a shantytown called The Widows, squeezed between a drainage ditch and putrid Lake Managua. Her neighbor Yadira Castellón also migrated from the mountains. Driven by hope for a better future for their children, Dayani, Yadira, and their husbands invent jobs in Managua's spreading markets and dumps, joining the planet's burgeoning informal economy. But a swelling tide of family crises and environmental calamities threaten to break their

toehold in the city Dayani's and Yadira's struggles reveal one of the world's biggest challenges by 2050 almost one third of all people will likely live in slums without basic services vulnerable to disasters caused by the convergence of climate change and breakneck urbanization To tell their stories Douglas Haynes followed Dayani's and Yadira's families for five years learning firsthand how their lives in the city are a tightrope walk between new opportunities and chronic insecurity Every Day We Live Is the Future is a gripping unforgettable account of two women's herculean efforts to persevere and educate their children It sounds a powerful call for understanding the growing risks to new urbanites how to help them prosper and why their lives matter for us all

A Critical Auto/Ethnography of Learning Spanish Phiona Stanley, 2016-11-10 The premise that intercultural contact produces intercultural competence underpins much rationalization of backpacker tourism and in country language education However if insufficiently problematized pre-existing constructions of cultural otherness may hinder intercultural competence development This is nowhere truer than in contexts in which wide disparities of power wealth and privilege exist and where such positionings may go unproblematized This study contributes to theoretical understandings of how intercultural competence develops through intercultural contact situations through a detailed multiple case study of three conceptually comparable contexts in which Western backpackers study Spanish in Latin America This experience often bundled with home stay volunteer work social and tourist experiences offers a rich set of empirical data within which to understand the nature of intercultural competence and the processes through which it may be developed Models of a single context free transferable intercultural competence are rejected Instead suggestions are made as to how educators might help prepare intercultural sojourners by scaffolding their intercultural reflections and problematizing their own intersectional identities and their assumptions The study is a critical ethnography with elements of autoethnographic reflection The book therefore also contributes to development of this qualitative research methodology and provides an empirical example of its application

that has long claimed the right to reshape other nations while its own democratic institutions are in severe crisis
