,1925 The Function of Ornament Farshid Moussavi,2022-02-04 Architecture needs mechanisms that allow it to become
connected to culture It achieves this by continually capturing the forces that shape society as material to work with
Architecture s materiality is therefore a composite one made up of visible forces structural functional physical as well as
invisible forces cultural political temporal Architecture progresses through new concepts that connect with these forces
manifesting itself in new aesthetic compositions and affects Ornament is the by product of this process through which
architectural material is organized to transmit unique affects This book is a graphic guide to ornaments in the twentieth
century It unveils the function of ornament as the agent for specific affects dismantling the idea that ornament is applied to
buildings as a discrete or non essential entity Each case operates through greater or lesser depth to exploit specific synergies
between the exterior and the interior constructing an internal order between ornament and material These internal orders
produce expressions that are contemporary yet whose affects are resilient in time **Encyclopaedia Britannica** ,1929
