Online Urbanism Frank Lloyd Wright:

The Urbanism of Frank Lloyd Wright Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects produced over more than fifty years within their historical, cultural, and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial, mixed-use, civic, and cultural centers for Chicago, Madison, Washington, Pittsburgh, and Baghdad, Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings, plans, maps, and photographs, this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come.

Intercultural Urbanism Dean Saitta, 2020-07-23 Cities today are paradoxical. They are engines of innovation and opportunity, but they are also plagued by significant income inequality and segregation by ethnicity, race, and class. These inequalities and segregations are often reinforced by the urban built environment, the planning of space, and the design of architecture. This condition threatens attainment of wider social and economic prosperity. In this innovative new study, Dean Saitta explores questions of urban sustainability by taking an intercultural, trans-historical approach to city planning. Saitta uses a largely untapped body of knowledge, the archaeology of cities in the ancient world, to generate ideas about how public space, housing, and civic architecture might be better designed to promote inclusion and community while also making our cities more environmentally sustainable. By integrating this knowledge with knowledge generated by evolutionary studies and urban ethnography, including a detailed look at Denver, Colorado, one of America's most desirable and fastest-growing destination cities but one that is also experiencing significant spatial segregation and gentrification, Saitta's book offers an invaluable new perspective for urban studies scholars and urban planning professionals.

Interior Urbanism Charles Rice, 2016-02-25
Vast interior spaces have become ubiquitous in the contemporary city The soaring atriums and concourses of mega hotels shopping malls and transport interchanges define an increasingly normal experience of being inside in a city Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city's authentic life on the outside Interior Urbanism explores the roots of this contemporary tension between inside and outside identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in 1960s and 70s America Portman increasingly recognised as an influential yet understudied figure was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces but for the future of the American downtown amid the upheavals of the 1960s and 70s The book analyses Portman's architecture in order to reconsider major contexts of debate in architecture and urbanism in this period including the massive expansion of a commercial imperative in architecture shifts in the governance and development of cities amid

social and economic instability the rise of postmodernism and critical urban studies and the defence of the street and public space amid the continual upheavals of urban development In this way the book reconsiders the American city at a crucial time in its development identifying lessons for how we consider the forces at work and the spaces produced in cities in the present
