This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Sustainable Communities and Green Lifestyles Tendai

Chitewere, 2017-08-09 Sustainable communities raise questions about the compatibility of capitalism and environmentalism and how we can green our way of life in a capitalist economy that values short term production and consumption over long term conservation and simple living If capitalism and its drive towards consumption has produced social and environmental degradation is it the best medium to identify solutions Sustainable Communities and Green Lifestyles examines one ecovillage as it attempts to create a sense of community while reducing its impact on the natural environment Through extensive participant observation the book demonstrates how ecovillages are immersed within a larger discourse of class race and lifestyle choices highlighting the inseparability of environmental sustainability and social justice Sustainable communities are confronted by the contradictions of green consumption and must address social inequality or risk focusing inward on personal green consumerism creating mere green havens for the few who can afford to live in them This book cautious of redirecting environmentalist efforts away from structural solutions and onto personal environmentalism offers a critical perspective on the challenges of an emerging green lifestyle This book offers a critical perspective on the direction of US environmentalism and contributes to debates in environmental studies anthropology and urban planning
