**Thunder in the East** Evan Mawdsley,2005 This text presents a clear overview of the Soviet Union's struggle with Nazi Germany in WWII It analyses the Red Army and the Wehrmacht their leaders strategy and operations and the command and production systems that organized and sustained them [Soviet Women on the Frontline in the Second World War](#) R. Markwick,E. Charon Cardona,2012-06-26 This is the first comprehensive study in English of Soviet women who fought against the genocidal misogynist Nazi enemy on the Eastern Front during the Second World War Drawing on a vast array of original archival memoir and published sources this book captures the everyday experiences of Soviet women fighting living and dying on the front *Stalin's Defectors* Mark Edele,2017 The first systematic study of the phenomenon of frontline surrender to the Germans in the Soviet Union's Great Patriotic War against the Nazis in 1941 1945 showing that while people were disgruntled with Stalin's rule most attempts to cross the frontline stemmed from a wish to survive this war rather than a desire to support Hitler's regime *The Global Revolution* Silvio Pons,2014-08-28 The Global Revolution A History of International Communism 1917 1991 establishes a relationship between the history of communism and the main processes of globalization in the past century Drawing on a wealth of archival sources Silvio Pons analyses the multifaceted and contradictory relationship between the Soviet Union and the international communist movement to show how communism played a major part in the formation of our modern world The volume presents the argument that during the age of wars from 1914 to 1945 the establishment of the Soviet state in Russia and the birth of the communist movement had an enormous impact because of their promise of world revolution and international civil war Such perspective appeared even more plausible in the aftermath of the Second World War and of revolution in China which paved the way for the expansion of communism in the post colonial world Communism challenged the West in the Cold War by means of anti capitalist modernization and anti imperialist mobilization showing itself to be a powerful factor in the politicization of global trends However the international legitimacy of communism declined rapidly in the post war era Soviet power exposed its inability to exercise hegemony as distinct from domination The consequences of Sovietization in Europe and the break between the Soviet Union and China were the primary reasons for the decline of communist influence and appeal Since communism lost its political credibility and cultural cohesion its global project had failed The ground was prepared for the devastating impact of Western globalization on communist regimes in Europe and the Soviet Union **The Sea and the Second World War** Marcus Faulkner,Alessio Patalano,2019-12-10 The sea shaped the course and conduct of World War II from the first moments of the German invasion of Poland on September 1 1939 to the Japanese surrender on September 2 1945 The impact could be felt far beyond the shoreline as the arms and armies carried across the oceans were ultimately destined to wage war ashore Populations and industries depended on the raw materials and supplies in a war that increasingly became a contest of national will and economic might Ultimately it was the war at sea that linked numerous regional conflicts and theaters of

operation into a global war As the war grew in complexity and covered an increasingly larger geographical area the organization of the maritime effort and the impact it had on the formulation of national strategy also evolved This volume illustrates the impact of naval operations on the Second World War by highlighting topics previously neglected in the scholarship In doing so it provides new insights into political strategic administrative and operational aspects of the maritime dimension of the war

*Disputed Decisions of World War II* Mark Thompson, 2020-01-17 A

former Harvard professor of decision science and game theory draws on those disciplines in this review of controversial strategic and tactical decisions of World War II Allied leaders although outstanding in many ways sometimes botched what now is termed meta decision making or deciding how to decide Operation Jubilee a single division raid on Dieppe France in August 1942 for example illustrated the pitfalls of groupthink In the Allied invasion of North Africa three months later American and British leaders fell victim to the planning fallacy having unrealistically rosy expectations of an easy victory In Sicily in the summer of 1943 they violated the millennia old principle of command unity now re endorsed and elaborated on by modern theorists Had Allied strategists understood the game theory of bluffing in January 1944 they might well not have landed two plus divisions at Anzio in Italy

*Fighting Talk* Colin S. Gray, 2007-04-30 Gray presents an inventive treatise on the nature of strategy war and peace organized around forty maxims This collection of mini essays will forearm politicians soldiers and the attentive general public against many probably most fallacies that abound in contemporary debates about war peace and security While one can never guarantee strategic success which depends on policy military prowess and the quality of the dialogue between the two a strategic education led by the judgments in these maxims increases the chances that one's errors will be small rather than catastrophic The maxims are grouped according to five clusters War and Peace tackles the larger issues of strategic history that drive the demand for the services of strategic thought and practice Strategy presses further into the realm of strategic behavior and serves as a bridge between the political focus of part one and the military concerns that follow In Military Power and Warfare turns to the pragmatic business of military performance operations tactics and logistics Part four Security and Insecurity examines why strategy is important including a discussion of the nature dynamic character and functioning of world politics Finally History and the Future is meant to help strategists better understand the processes of historical change

Strategy and Politics Colin S. Gray, 2016-01-29 This book examines the subject of strategy and its relationship with politics Despite the fact that strategy is always the product of political process the relationship between the two concepts and their ancillary activities has scarcely been touched by scholars This book corrects that serious deficiency and explains the high relevance of political factors for matters of general defence Each chapter aims to show how and why strategy and politics interact and how this interaction has had significant consequences historically Neither strategy nor politics can make sense if considered alone Strategy requires direction that can only be provided by political process while politics cannot be implemented without strategy In summary this volume will explain what strategy is and is not why strategy is essential what strategy does and how it does it how strategy is made and executed Written by a leading scholar and former practitioner this book will be essential reading for all students of military strategy strategic studies security studies and war and conflict studies

*Estalinismo en guerra 1937 1949* Mark Edele, 2022-08-31 Del estallido de las hostilidades con Jap n en Manchuria a la Guerra de Invierno con Finlandia de los albores de la Segunda Guerra Mundial en el este de Europa a la devastaci n de la invasi n alemana del inexorable avance hasta las mism simas ruinas de Berl n a la sangrienta contrainsurgencia en las fronteras de Ucrania Bielorrusia y los pa ses b lticos la experiencia b lica de la Uni n Sovi tica de Stalin fue mucho m s larga extensa y compleja de lo que tradicionalmente se ha considerado A partir de las dram ticas experiencias tanto de ciudadanos corrientes como de aquellos que tuvieron un devenir extraordinario en el conflicto rusos y coreanos ucranianos y jud os lituanos y georgianos hombres y mujeres leales estalinistas y cr ticos del r gimen el aclamado sovi et logo Mark Edele nos revela c mo a pesar de los estragos desatados por las purgas del Gran Terror el implacable r gimen estalinista fue capaz de construir una maquinaria militar tremendamente ineficiente como atestiguan los millones de

bajas sufridas y las toneladas de material militar perdidas pero sin embargo sumamente eficaz entre 1937 y 1949 el Ejército Rojo emergió victorioso de todos y cada uno de los enfrentamientos en los que se vio sumido y posibilitó la victoria aliada en la Segunda Guerra Mundial. Éste nos presenta una narración que entreteje un fascinante retrato social y cultural con el fragor de la alta política, la trayectoria militar y las transformaciones económicas de los años de la guerra. El resultado es una documentada, atractiva e inteligente crónica de la Unión Soviética en tiempos de Stalin.

**Work in a Modern Society** Jürgen Kocka, 2010-02-01 Whereas the history of workers and labor movements has been widely researched the history of work has been rather neglected by comparison. This volume offers original contributions that deal with cultural, social and theoretical aspects of the history of work in modern Europe including the relations between gender and work, working and soldiering, work and trust, constructions and practices. The volume focuses on Germany but also places the case studies in a broader European context. It thus offers an insight into social and cultural history as practiced by German speaking scholars today but also introduces the reader to ongoing research in this field.
