**Remote Delivery** Zhengping Qu, 2021-04-27 This book records the author's years of experience in the software industry. In his own practices, the author has found that the distributed work pattern has become increasingly popular in more and more work environments, either between vendors and customers or between different teams inside a company. This means that all practitioners in the software industry need to adapt to this new way of communication and collaboration and get skilled enough to meet the greater challenges in integrating the distributed work pattern with agile software delivery. By centering on the difficulties in communication and collaboration between distributed teams, this book digs into the reasons why so many remote delivery projects end up anticlimactic and provides solutions for readers' reference. It also cites successful cases in promoting agile development in distributed teams, which has been a vexing problem for many software development companies. In addition, readers can find suggestions and measures for building self-managing teams in this book. **Remote Delivery: A Guide to Software Delivery through Collaboration between Distributed Teams** is a very practical guide for software delivery teams with their members distributed in different places and companies engaged in software customization. Developers, QAs, product managers, and project leaders can also be inspired by this book.

**Assistive Technology** Alain Pruski, Harry Knops, 2005 Points towards the difficulty encountered in research and development carried out by laboratories to reach the users. **Cooperative Design, Visualization, and Engineering** Yuhua Luo, 2009-09-07 The 6th International Conference on Cooperative Design, Visualization, and Engineering (CDVE 2009) was held in central Europe, Luxembourg. Participants from various continents came together to celebrate this annual event. The papers published in the conference in this volume reflect the new progress in the following aspect. Research in developing cooperative applications is currently focusing on two directions. One is the cooperation in the software development process, and the other is the variety of the targeted cooperative software products. Many papers address how to facilitate cooperation in the software engineering process, particularly global software engineering. The importance of sharing information in cooperation is emphasized by the authors. For example, papers that addressed the development of sharing mental models, tools for easily shared projects, sharing links for cross-media information spaces, sharing resources, and transfer of knowledge among team members, etc., have attracted special attention. Many papers presented in this volume are the research results of tackling problems in developing a great variety of cooperative software products. The targeted systems are cooperative support for music creation, cooperative process management systems, cooperative visualization systems for geographic information, cooperative cultural information sharing platforms, cooperative reasoning systems, cooperative sensor networks for environment monitoring, remote cooperative video vehicle monitoring systems, etc. Another aspect of the papers in this volume is dealing with the problems in earlier phases in the

cooperative product production life cycle The topics addressed range from partner selection for operation at the beginning requirement gathering requirement negotiation to cooperativedesign production to cooperative testing and nally to cooperative system operation
