Speech and Silence in Contemporary Children's Literature Danielle E. Price, 2023-10-31 *Speech and Silence in Contemporary Children's Literature* brings a fresh perspective to a central literary question Who speaks by examining a variety of represented silences These include children who do not speak do not yet speak effectively or speak on behalf of others A rich and unexamined literary archive explores the problematics of children who are literally silent or metaphorically so because they cannot communicate effectively with adults or peers This project centers children's literature in the question of voice by considering disability gender race and ecocriticism Children's literature rests on a paradox at the root of its own genre it is produced by an adult author writing to a constructed idea of what children should be By reading a range of contemporary children's literature this book scrutinizes how such texts narrate the child's journey from communicative alterity to a place of empowered adult speech Sometimes the child's verbal enclosure enables privacy and resistance At other times silence is coerced or imposed or arises from bodily impairment Children may act as intermediaries speaking on behalf of species that cannot Recently we have seen children exercise their voices on the world stage and as authors In all cases the texts analyzed here reveal speech as a minefield to be traversed Children who talk too much too little or with insufficient expertise pose problems to themselves and others Implicitly and sometimes explicitly they attempt to hold adults to account inside and outside the text *Speech and Silence in Contemporary Children's Literature* addresses this underconceptualized subject in what will be an important text for scholars of children's literature childhood studies English disability studies gender studies race studies ecopedagogy and education

Suffering in Silence Donna Mac LCPC, 2015-09-29 Selective mutism is an anxiety disorder and its currently one of the most misunderstood under diagnosed and undertreated mental health conditions When children with selective mutism feel expected or pressured to speak in social situations they become terrified Therefore their level of anxiety significantly increases but by remaining silent their anxiety level slightly decreases obtaining some relief for themselves For these children remaining silent is actually an ineffective coping mechanism or a maladapted solution to create a sense of safety within themselves Hence their mouths freeze and they are silent This is temporary relief but longitudinally these children suffer in silence Due to the fact that many children will display normative shy behavior or even socially anxious behavior at times it can be challenging to discern if the child's behavior falls within normal limits or if the child actually demonstrates clinically significant behavior signifying a selective mutism diagnosis This can be confusing for parents teachers and even clinicians This manual is meant to help clarify this distinction and will also assist you in figuring out how to seek help ask the right questions and what you can expect from early intervention services school based services and holistic therapeutic and
