offers immense challenges to traditional dispute resolution methods as it entails parties often located in different parts of the world making contracts with each other at the click of a mouse. The use of traditional litigation for disputes arising in this forum is often inconvenient, impractical, time consuming and expensive due to the low value of the transactions and the physical distance between the parties. Thus, modern legal systems face a crucial choice: either to adopt traditional dispute resolution methods that have served the legal systems well for hundreds of years, or to find new methods which are better suited to a world not anchored in territorial borders.

Online Dispute Resolution (ODR) is originally an offshoot of Alternative Dispute Resolution (ADR). ADR takes advantage of the speed and convenience of the Internet, becoming the best and often the only option for enhancing consumer redress and strengthening their trust in e-commerce. This book provides an in-depth account of the potential of ODR for European consumers, offering a comprehensive and up-to-date analysis of the development of ODR. It considers the current expansion of ODR and evaluates the challenges posed in its growth. The book proposes the creation of legal standards to close the gap between the potential of ODR services and their actual use, arguing that ODR, if it is to realise its full potential in the resolution of e-commerce disputes and in the enforcement of consumer rights, must be grounded firmly on a European regulatory model.

Law, Technology and Dispute Resolution Riikka Koulu, 2018-09-24. The use of new information and communication technologies both inside the courts and in private online dispute resolution services is quickly changing everyday conflict management. However, the implications of the increasingly disruptive role of technology in dispute resolution remain largely undiscussed. In this book, assistant professor of law and digitalisation, Riikka Koulu, examines the multifaceted phenomenon of dispute resolution technology, focusing specifically on private enforcement, which modern technology enables on an unforeseen scale. The increase in private enforcement confounds legal structures and challenges the nation-state's monopoly on violence. And in this respect, the author argues that the technology-driven privatisation of enforcement, from direct enforcement of e-commerce platforms to self-executing smart contracts in the blockchain, brings the ethics of law's coercive nature out into the open. This development constitutes a new and dangerous grey area of conflict management which calls for transparency and public debate on the ethical implications of dispute resolution technology.
