**Design for Transport** Mike Tovey, 2016-04-15 The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility The authors show how creative designers can take a user focused approach for a wide range of types of transport products and systems In so doing their starting point is one of creative dissatisfaction with what is currently available and their specialist capability is in imagining and developing new solutions which respond to that opportunity How this is tackled varies depending on the context and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for The chapters cover user needs and transport design and the transport system transport design case studies and the case for the automobile A conclusion briefly signals what the future for transport design might be Lavishly illustrated throughout in four colour Design for Transport is an imaginative and rigorous guide to how designers can take a user centred and socially responsible approach to tackling a range of types of transport from systems to products and from bicycles to automobiles demonstrating a rich array of solutions through case studies

**Evaluation and Decision Models** Denis Bouyssou, Thierry Marchant, Marc

Pirlot, Patrice Perny, Alexis Tsoukias, P. Vincke, 2012-12-06 1 1 Motivations Deciding is a very complex and difficult task Some people even argue that our ability to make decisions in complex situations is the main feature that distinguishes us from animals it is also common to say that laughing is the main difference Nevertheless when the task is too complex or the interests at stake are too important it quite often happens that we do not know or we are not sure what to decide and in many instances we resort to a decision support technique an informal one we toss a coin we ask an oracle we visit an astrologer we consult an expert we think or a formal one Although informal decision support techniques can be of interest in this book we will focus on formal ones Among the latter we find some well known decision support techniques cost benefit analysis multiple criteria decision analysis decision trees But there are many other ones sometimes not presented as decision support techniques that help making decisions Let us cite but a few examples When the director of a school must decide whether a given student will pass or fail he usually asks each teacher to assess the merits of the student by means of a grade The director then sums the grades and compares the result to a threshold When a bank must decide whether a given client will obtain a credit or not a technique called credit scoring is often used

**Emerging Capitalism in Central Europe and Southeast Asia** F. Bafail, 2015-12-24 This book examines the emergence of different forms of capitalism in Central Eastern states in Europe and Mekong states within the Association of Southeast Asian Nations ASEAN All of them but Thailand have historically disappeared from the regional maps for long periods of time due to colonial or imperial rule Most of them were previously members of a soviet type economy and they all joined ASEAN or the European Union in the 1990s or in the 2000s These states are characterized by a strong urge toward feelings of national sovereignty due to their experiences with colonialism and imperialism But due to the regional economic pressures and the globalization dynamic these states cannot articulate protectionist policies They are forced to open their economies in order to attract Foreign Direct Investments This results in less regulated and more political forms of capitalism than in some more developed capitalist countries This book analyzes forms of capitalism as the arising from a combination of three conditions the legacy of the foreign occupations the national construction process of the sovereign state and lastly the dynamics of regional integration These states claims to national sovereignty and the manner in which they developed suggests a causative link between the forms of political domination that have presided over these transformations and the forms of capitalism that have resulted

**Dollar and Yen** Ronald I. McKinnon,Kenichi Ohno,1997 Dollar and Yen analyzes the friction between the United States and Japan from the viewpoint of exchange rate economics From the mid 1950s to the early 1990s Japan grew faster than any other major industrial economy displacing the United States in dominance of worldwide manufacturing markets In the 1970s and 1980s many books appeared linking the apparent decline of the United

States in the world economy to unfair Japanese practices that closed the Japanese market to a wide range of foreign goods Dollar and Yen analyzes the friction between the United States and Japan from the viewpoint of exchange rate economics The authors argue against the prevailing view that the trade imbalance should be corrected by dollar depreciation saying that adjustment through the exchange rate is both ineffective and costly Stepping outside the traditional dichotomy between international trade and international finance they link the yen s tremendous appreciation from 1971 to mid 1995 to mercantile pressure from the United States arising from trade tensions between the two countries Although sometimes resisted by the Bank of Japan this yen appreciation nevertheless forced unwanted deflation on the Japanese economy after 1985 resulting in two major recessions endaka fukyos The authors argue for relaxing commercial tensions between the two countries and for limiting future economic downturns by combining a commercial compact for mutual trade liberalization with a monetary accord for stabilizing the yen dollar exchange rate Asian Company Handbook ,1997
