Double Time Jane Roper, 2012-05-08 Becoming a mother is rarely what you expect Jane Roper never expected she d have twins or that they d be such a spirited twosome She didn t expect that finding the right balance of work and home would be so tricky And she certainly didn t expect she d grapple with a diagnosis of bipolar disorder during her daughters toddler years But she also didn t anticipate just how much joy laughter and self discovery motherhood would bring Full of warmth honesty occasional advice and a generous helping of humor Double Time is a smart and engaging account of the first three years with multiples and a refreshingly candid and vulnerable look at clinical depression It s a memoir that will resonate countless women especially those parenting in double time

The Twin in the Transference Vivienne Lewin, 2018-05-16 The universal phantasy of having a twin originates in our earliest relational experiences This book is about twins and twinning processes The

existence of an actual twin alive or dead may be experienced as an embodiment of the phantasy of having a twin with developmental consequences Twinning processes in twins lead to the creation of an internal twin relationship that is enduring The twin relationship may be at the narcissistic end of the spectrum leading to an enmeshed twinship or it may be a more mature object relationship All twin relationships will be manifest in the transference relationship with the analyst The twin transference has been largely neglected in the psychoanalytic literature to the detriment of our understanding of dynamic processes in twin patients In this book case material is used to explore the nature of the twin transference relationship and the necessity of analysing the twin transference as well as maternal and paternal transference relationships

Mothering Multiples Karen Kerkhoff Gromada, 1985 **Having Twins** Elizabeth Noble, 1980 **Twins**, 2000 *Handbook of Social Development* Vincent B. Van Hasselt, Michel Hersen, 1992-08-31 Social development over one's lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin's Handbook of Socialization no comprehensive statement of the field has appeared in book form Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one's senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with

introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finall we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook *Not All Twins Are Alike* Barbara Klein,2003-02-28 Even twins are unique Most people idealize twins fantasizing a close perpetually loving relationship Yet Klein herself an identical twin demonstrates that twins have complicated and intense relationships that range from over identification or excessive closeness to profound estrangement and conflict Most twins who are raised as individuals deal with the significant emotional pain of separation in adolescence or young adulthood yet as mature adults can come to love and respect each other as individuals As Klein makes clear the parenting that twins receive as infants and young children affects the relationships that they have with one another and with the world they choose to function in Because parenting is a critical determinant of psychological well being it should be treated as a serious but manageable challenge This book is a must read for twins their parents and scholars students and other researchers and professionals dealing with mental health and child development Nursing Research Denise F. Polit,Cheryl Tatano Beck,2004 This graduate level nursing research textbook continues the expansion of coverage on qualitative research including important issues for specific qualitative traditions such as grounded theory phenomenology and ethnography Developing solid evidence for practice will be emphasized throughout the text and important evaluative concepts like reliability validity and trustworthiness will be introduced Other new features include stronger international content with an emphasis on Canadian and Australian research inclusion of tips in boxes located in appropriate places throughout the chapters and the use of summary bullet points This edition will now offer a free Connection Website connection LWW com go polit Essentials of Nursing Research Denise F. Polit,Cheryl Tatano Beck,2010 Essentials of Nursing Research is designed to teach students how to read understand analyze and evaluate research reports in nursing practice The Seventh Edition has been updated with stronger coverage of evidence based practice including content on how to read interpret and critique systematic reviews which are considered by many to be a cornerstone of evidence based practice Also included in the Seventh Edition a more balanced presentation of medical and social science methods and nomenclature enhanced coverage of qualitative research and more
