Fake Physics: Spoofs, Hoaxes and Fictitious Science Andrew May,2019-04-12 People are used to seeing fake physics

in science fiction concepts like faster than light travel, antigravity and time travel to name a few. The fiction label ought to be a giveaway, but some SF writers, especially those with a background in professional science, are so adept at technobabble that it can be difficult to work out what is fake and what is real. To confuse matters further, Isaac Asimov's 1948 piece about the fictitious time travelling substance, thiotimoline, was written not as a short story but in the form of a spoof research paper. The boundaries between fact and fiction can also be blurred by physicists themselves, sometimes unintentionally, sometimes with tongue in cheek, sometimes to satirize perceived weaknesses in research practices. Examples range from hoaxes aimed at exposing poor editorial standards in academic publications through thought experiments that sound like the plot of a sci-fi movie to April Fools jokes. Even the latter may carry a serious message, whether about the sociology of science or poking fun at legitimate but far-out scientific hypotheses. This entertaining book is a joyous romp exploring the whole spectrum of fake physics, from science to fiction and back again.

Megaregulation Contested Benedict Kingsbury, David M. Malone, Paul Mertenskötter, Richard B. Stewart, Thomas Streinz, Atsushi Sunami, 2019-06-06
The Japan-led Trans-Pacific Partnership (CPTPPA) of 2018 is the most far-reaching megaregional economic agreement in force with several major countries. Beyond its eleven negotiating countries, also interested. Still bearing the stamp of the original US involvement before the Trump era reversal, TPP is the first instance of megaregulation, a demanding combination of inter-state economic ordering and national regulatory governance on a highly ambitious substantive and trans-regional scale. Its text and ambition have influenced other negotiations ranging from the Japan-EU Agreement (JEEPA) and the US-Mexico-Canada Agreement (USMCA) to the projected Pan-Asian Regional Comprehensive Economic Partnership (RCEP). This book provides an extensive analysis of TPP as a megaregulatory project for channelling and managing new pressures of globalization and of core critical arguments made against economic megaregulation from standpoints of development, inequality, labour rights, environmental interests, corporate capture and elite governance. Specialized chapters cover supply chains, digital economy, trade facilitation, intellectual property, currency levels, competition and state-owned enterprises, government procurement, investment prescriptions for national regulation and the TPP institutions. Country studies include detailed analyses of TPP-related politics and approaches in Japan, Mexico, Brazil.

China India Indonesia and Thailand Contributors include leading practitioners and scholars in law economics and political science At a time when the WTO and other global scale institutions are struggling with economic nationalism and geopolitics and bilateral and regional agreements are pressed by public disagreement and incompatibility with digital and capital and value chain flows the megaregional ambition of TPP is increasingly important as a precedent requiring the close scrutiny this book presents
